

System::Windows::Controls
::UserControl

System::Windows::Markup
::IComponentConnector

RaceDay.WpfUi.Views.Races
SummaryView

```
graph LR; A[RaceDay.WpfUi.Views.RacesSummaryView] --> B[System::Windows::Controls::UserControl]; A --> C[System::Windows::Markup::IComponentConnector];
```

The diagram illustrates a relationship between a custom WPF View and two base interfaces. A central gray box on the right, labeled 'RaceDay.WpfUi.Views.RacesSummaryView', has two blue arrows pointing left towards two white boxes. The top white box is labeled 'System::Windows::Controls::UserControl' and the bottom white box is labeled 'System::Windows::Markup::IComponentConnector'. This indicates that the custom View inherits from or implements both the UserControl and IComponentConnector interfaces.
