5 Class Documentation	17
5.1 RaceDay.WpfUi.Views.AddRacerView Class Reference	17
5.1.1 Detailed Description	18
5.2 RaceDay.WpfUi.ViewModels.AddRacerViewModel Class Reference	18
5.2.1 Detailed Description	21
5.2.2 Constructor & Destructor Documentation	21
5.2.2.1 AddRacerViewModel()	21
5.2.3 Member Function Documentation	21
5.2.3.1 OnNavigatedTo()	21

5.3 RaceDay.WpfUi.App Class Reference	22
5.3.1 Detailed Description	23
5.3.2 Member Function Documentation	23
5.3.2.1 Main()	23
5.4 RaceDay.WpfUi.Controls.AppHeader Class Reference	23
5.4.1 Detailed Description	24
5.5 RaceDay.WpfUi.Startup.Bootstrapper Class Reference	25
5.5.1 Detailed Description	25
5.5.2 Member Function Documentation	25
5.5.2.1 Bootstrap()	25
5.6 RaceDay.WpfUi.Controls.CardDataField Class Reference	26
5.6.1 Detailed Description	27
5.6.2 Member Data Documentation	27
5.6.2.1 HeaderProperty	27
5.6.2.2 ImageSourceProperty	27
5.6.2.3 ValueProperty	28
5.7 RaceDay.SQLite.Infrastructure.CommandQueryBase Class Reference	28
5.7.1 Detailed Description	30
5.7.2 Constructor & Destructor Documentation	30
5.7.2.1 CommandQueryBase()	30
5.8 RaceDay.SQLite.Commands.CreateRaceCommand Class Reference	30
5.8.1 Detailed Description	32
5.9 RaceDay.SQLite.Commands.CreateRaceDayCommand Class Reference	32
5.9.1 Detailed Description	33
5.9.2 Member Function Documentation	33
5.9.2.1 Execute()	33
5.10 RaceDay.WpfUi.Views.CreateRaceDayView Class Reference	34
5.10.1 Detailed Description	35
5.11 RaceDay.SQLite.Commands.CreateRaceRacerCommand Class Reference	35
5.11.1 Detailed Description	37
5.11.2 Member Function Documentation	37
5.11.2.1 Execute()	37
5.12 RaceDay.SQLite.Commands.CreateRacerCommand Class Reference	38
5.12.1 Detailed Description	39
5.12.2 Member Function Documentation	39
5.12.2.1 Execute()	39
5.13 RaceDay.SQLite.Commands.CreateRacerLapCommand Class Reference	40
5.13.1 Detailed Description	42
5.13.2 Member Function Documentation	42
5.13.2.1 Execute()	42
5.14 RaceDay.Domain.Exceptions.CreateRecordException Class Reference	42
5.14.1 Detailed Description	43

5.14.2 Constructor & Destructor Documentation	43
5.14.2.1 CreateRecordException() [1/2]	43
5.14.2.2 CreateRecordException() [2/2]	43
5.15 RaceDay.WpfUi.Views.DatePickerView Class Reference	44
5.15.1 Detailed Description	45
5.16 RaceDay.SqlLite.Queries.DaySummaryQuery Class Reference	45
5.16.1 Detailed Description	46
5.16.2 Member Function Documentation	46
5.16.2.1 GetAll()	46
5.16.2.2 GetById()	46
5.17 RaceDay.WpfUi.Views.DaySummaryView Class Reference	47
5.17.1 Detailed Description	48
5.18 RaceDay.WpfUi.ViewModels.DaySummaryViewModel Class Reference	48
5.18.1 Detailed Description	50
5.18.2 Constructor & Destructor Documentation	50
5.18.2.1 DaySummaryViewModel()	50
5.18.3 Member Function Documentation	50
5.18.3.1 LoadData()	50
5.19 RaceDay.SqlLite.Commands.DeleteRaceLapCommand Class Reference	51
5.19.1 Detailed Description	52
5.19.2 Member Function Documentation	52
5.19.2.1 Execute()	52
5.20 RaceDay.SqlLite.Commands.DeleteRaceRacerCommand Class Reference	53
5.20.1 Detailed Description	54
5.20.2 Member Function Documentation	54
5.20.2.1 Execute()	54
5.21 RaceDay.WpfUi.Services.DialogService Class Reference	55
5.21.1 Detailed Description	56
5.21.2 Constructor & Destructor Documentation	56
5.21.2.1 DialogService()	56
5.21.3 Member Function Documentation	56
5.21.3.1 DisplayDialogAsync< TViewModel, TModel >()	56
5.21.3.2 DisplayDialogAsync< TViewModel, TModel, TResult >()	57
5.22 RaceDay.WpfUi.Infrastructure.DialogViewModelBase< TModel, TResult > Class Template Reference	58
5.22.1 Detailed Description	60
5.22.2 Property Documentation	60
5.22.2.1 Model	60
5.23 RaceDay.WpfUi.Converters.EqualityToVisibilityConverter Class Reference	61
5.23.1 Detailed Description	61
5.24 RaceDay.WpfUi.ValidationRules.FloatValidationRule Class Reference	62
5.24.1 Detailed Description	63
5.25 XamlGeneratedNamespace.GeneratedInternalTypeHelper Class Reference	63

5.25.1 Detailed Description	64
5.26 RaceDay.WpfUi.Pages.HomePage Class Reference	64
5.26.1 Detailed Description	65
5.27 RaceDay.WpfUi.Views.HomeView Class Reference	66
5.27.1 Detailed Description	66
5.28 RaceDay.WpfUi.ViewModels.HomeViewModel Class Reference	67
5.28.1 Detailed Description	68
5.28.2 Constructor & Destructor Documentation	68
5.28.2.1 HomeViewModel()	68
5.28.3 Member Function Documentation	69
5.28.3.1 OnNavigatedTo()	69
5.29 RaceDay.Domain.Interfaces.ICreateRaceCommand Interface Reference	70
5.29.1 Detailed Description	71
5.30 RaceDay.Domain.Interfaces.ICreateRaceDayCommand Interface Reference	71
5.30.1 Detailed Description	71
5.30.2 Member Function Documentation	71
5.30.2.1 Execute()	71
5.31 RaceDay.Domain.Interfaces.ICreateRaceRacerCommand Interface Reference	72
5.31.1 Detailed Description	73
5.32 RaceDay.Domain.Interfaces.ICreateRacerCommand Interface Reference	73
5.32.1 Detailed Description	74
5.33 RaceDay.Domain.Interfaces.ICreateRacerLapCommand Interface Reference	74
5.33.1 Detailed Description	76
5.34 RaceDay.Domain.Interfaces.IDaySummaryQuery Interface Reference	76
5.34.1 Detailed Description	76
5.34.2 Member Function Documentation	76
5.34.2.1 GetAll()	76
5.34.2.2 GetById()	77
5.35 RaceDay.Domain.Interfaces.IDeleteRaceLapCommand Interface Reference	77
5.35.1 Detailed Description	78
5.35.2 Member Function Documentation	78
5.35.2.1 Execute()	78
5.36 RaceDay.Domain.Interfaces.IDeleteRaceRacerCommand Interface Reference	78
5.36.1 Detailed Description	79
5.36.2 Member Function Documentation	79
5.36.2.1 Execute()	79
5.37 RaceDay.Domain.Interfaces.IExchangeDataCommand< T > Interface Template Reference	79
5.37.1 Detailed Description	80
5.37.2 Member Function Documentation	80
5.37.2.1 Execute()	80
5.38 RaceDay.WpfUi.Interfaces.INavigableViewModel Interface Reference	80
5.38.1 Detailed Description	81

5.38.2 Member Function Documentation	81
5.38.2.1 OnNavigatedTo()	81
5.39 RaceDay.WpfUi.Extensions.Int32Extension Class Reference	82
5.39.1 Detailed Description	83
5.39.2 Constructor & Destructor Documentation	83
5.39.2.1 Int32Extension()	83
5.39.3 Member Function Documentation	83
5.39.3.1 ProvideValue()	83
5.40 RaceDay.WpfUi.Converters.InverseBooleanConverter Class Reference	83
5.40.1 Detailed Description	84
5.41 RaceDay.WpfUi.Converters.InverseEqualityToVisibilityConverter Class Reference	85
5.41.1 Detailed Description	85
5.42 RaceDay.Domain.Interfaces.IRacerLapQuery Interface Reference	86
5.42.1 Detailed Description	86
5.42.2 Member Function Documentation	86
5.42.2.1 GetLapsForRacerInRace()	86
5.43 RaceDay.Domain.Interfaces.IRacersQuery Interface Reference	87
5.43.1 Detailed Description	87
5.43.2 Member Function Documentation	87
5.43.2.1 GetAll()	87
5.43.2.2 GetRacersForRace()	87
5.44 RaceDay.Domain.Interfaces.IRaceSummaryQuery Interface Reference	88
5.44.1 Detailed Description	88
5.44.2 Member Function Documentation	88
5.44.2.1 GetAll()	88
5.44.2.2 GetById()	89
5.45 RaceDay.WpfUi.ViewModels.MainViewModel Class Reference	89
5.45.1 Detailed Description	91
5.45.2 Constructor & Destructor Documentation	91
5.45.2.1 MainViewModel()	91
5.46 RaceDay.WpfUi.MainWindow Class Reference	91
5.46.1 Detailed Description	92
5.47 RaceDay.WpfUi.Services.NavigationService Class Reference	92
5.47.1 Detailed Description	94
5.47.2 Constructor & Destructor Documentation	94
5.47.2.1 NavigationService()	94
5.47.3 Member Function Documentation	94
5.47.3.1 NavigateTo()	94
5.47.3.2 NavigateTo< T >()	95
5.48 RaceDay.WpfUi.Models.NewRaceDayModel Class Reference	95
5.48.1 Detailed Description	98
5.49 RaceDay.WpfUi.Views.NewRaceDayView Class Reference	98

5.49.1 Detailed Description	99
5.50 RaceDay.WpfUi.ViewModels.NewRaceDayViewModel Class Reference	99
5.50.1 Detailed Description	101
5.50.2 Constructor & Destructor Documentation	101
5.50.2.1 NewRaceDayViewModel()	101
5.51 RaceDay.WpfUi.Models.NewRaceModel Class Reference	102
5.51.1 Detailed Description	103
5.52 RaceDay.WpfUi.Views.NewRaceView Class Reference	103
5.52.1 Detailed Description	104
5.53 RaceDay.WpfUi.ViewModels.NewRaceViewModel Class Reference	104
5.53.1 Detailed Description	107
5.53.2 Constructor & Destructor Documentation	107
5.53.2.1 NewRaceViewModel()	107
5.54 RaceDay.WpfUi.Infrastructure.ObservableObject Class Reference	107
5.54.1 Detailed Description	109
5.54.2 Member Function Documentation	109
5.54.2.1 OnPropertyChanged()	109
5.54.2.2 SetField< T >()	109
5.55 RaceDay.WpfUi.Infrastructure.ObservableObjectWithValidation Class Reference	110
5.55.1 Detailed Description	112
5.55.2 Member Function Documentation	112
5.55.2.1 SetField< T >()	112
5.56 RaceDay.WpfUi.Views.RaceDayRacesView Class Reference	113
5.56.1 Detailed Description	113
5.57 RaceDay.WpfUi.Views.RaceDaySummaryView Class Reference	114
5.57.1 Detailed Description	114
5.58 RaceDay.WpfUi.Models.RaceModel Class Reference	115
5.58.1 Detailed Description	116
5.59 RaceDay.WpfUi.Models.RacerLapModel Class Reference	117
5.59.1 Detailed Description	118
5.60 RaceDay.SQLite.Queries.RacerLapQuery Class Reference	118
5.60.1 Detailed Description	119
5.60.2 Member Function Documentation	119
5.60.2.1 GetLapsForRacerInRace()	119
5.61 RaceDay.WpfUi.Models.RacerModel Class Reference	120
5.61.1 Detailed Description	122
5.62 RaceDay.SQLite.Queries.RacersQuery Class Reference	123
5.62.1 Detailed Description	124
5.62.2 Member Function Documentation	124
5.62.2.1 GetAll()	124
5.62.2.2 GetRacersForRace()	124
5.63 RaceDay.WpfUi.Views.RacerView Class Reference	125

5.63.1 Detailed Description	126
5.64 RaceDay.WpfUi.ViewModels.RacerViewModel Class Reference	126
5.64.1 Detailed Description	128
5.64.2 Constructor & Destructor Documentation	128
5.64.2.1 RacerViewModel()	128
5.65 RaceDay.WpfUi.Views.RacesSummaryView Class Reference	129
5.65.1 Detailed Description	130
5.66 RaceDay.WpfUi.ViewModels.RacesSummaryViewModel Class Reference	130
5.66.1 Detailed Description	132
5.66.2 Constructor & Destructor Documentation	132
5.66.2.1 RacesSummaryViewModel()	132
5.66.3 Member Function Documentation	132
5.66.3.1 LoadRaceDayRaces()	132
5.66.3.2 UpdateViewTitle()	133
5.67 RaceDay.WpfUi.Models.RaceSummaryModel Class Reference	133
5.67.1 Detailed Description	134
5.68 RaceDay.SQLite.Queries.RaceSummaryQuery Class Reference	134
5.68.1 Detailed Description	135
5.68.2 Member Function Documentation	135
5.68.2.1 GetAll()	135
5.68.2.2 GetById()	136
5.69 RaceDay.WpfUi.Views.RaceView Class Reference	137
5.69.1 Detailed Description	137
5.70 RaceDay.WpfUi.ViewModels.RaceViewModel Class Reference	138
5.70.1 Detailed Description	139
5.70.2 Constructor & Destructor Documentation	139
5.70.2.1 RaceViewModel()	139
5.71 RaceDay.Domain.Exceptions.RecordExistException Class Reference	140
5.71.1 Detailed Description	141
5.71.2 Constructor & Destructor Documentation	141
5.71.2.1 RecordExistException()	141
5.72 RaceDay.WpfUi.Infrastructure.RelayCommand Class Reference	141
5.72.1 Detailed Description	142
5.72.2 Constructor & Destructor Documentation	142
5.72.2.1 RelayCommand()	142
5.72.3 Member Function Documentation	143
5.72.3.1 CanExecute()	143
5.72.3.2 Execute()	143
5.73 RaceDay.WpfUi.Converters.RowIndexConverter Class Reference	143
5.73.1 Detailed Description	144
5.74 RaceDay.WpfUi.Infrastructure.ViewModelBase Class Reference	145
5.74.1 Detailed Description	146

Chapter 1

Namespace Index

1.1 Package List

Here are the packages with brief descriptions (if available):

RaceDay	11
RaceDay.Domain	11
RaceDay.Domain.DTOS	11
RaceDay.Domain.Entities	11
RaceDay.Domain.Exceptions	11
RaceDay.Domain.Interfaces	12
RaceDay.SQLite	12
RaceDay.SQLite.Commands	12
RaceDay.SQLite.Infrastructure	12
RaceDay.SQLite.Queries	13
RaceDay.WpfUi	13
RaceDay.WpfUi.Controls	13
RaceDay.WpfUi.Converters	13
RaceDay.WpfUi.Extensions	13
RaceDay.WpfUi.Infrastructure	14
RaceDay.WpfUi.Interfaces	14
RaceDay.WpfUi.Models	14
RaceDay.WpfUi.Pages	14
RaceDay.WpfUi.Services	15
RaceDay.WpfUi.Startup	15
RaceDay.WpfUi.ValidationRules	15
RaceDay.WpfUi.ViewModels	15
RaceDay.WpfUi.Views	16
XamlGeneratedNamespace	16

Chapter 2

Hierarchical Index

2.1 Class Hierarchy

This inheritance list is sorted roughly, but not completely, alphabetically:

Application	
RaceDay.WpfUi.App	22
System.Windows.Application	
RaceDay.WpfUi.App	22
RaceDay.WpfUi.StartUp.Bootstrapper	25
RaceDay.SQLite.Infrastructure.CommandQueryBase	28
RaceDay.SQLite.Commands.CreateRaceCommand	30
RaceDay.SQLite.Commands.CreateRaceDayCommand	32
RaceDay.SQLite.Commands.CreateRaceRacerCommand	35
RaceDay.SQLite.Commands.CreateRacerCommand	38
RaceDay.SQLite.Commands.CreateRacerLapCommand	40
RaceDay.SQLite.Commands.DeleteRaceLapCommand	51
RaceDay.SQLite.Commands.DeleteRaceRacerCommand	53
RaceDay.SQLite.Queries.DaySummaryQuery	45
RaceDay.SQLite.Queries.RaceSummaryQuery	134
RaceDay.SQLite.Queries.RacerLapQuery	118
RaceDay.SQLite.Queries.RacersQuery	123
Control	
RaceDay.WpfUi.Controls.CardDataField	26
DialogViewModelBase	
RaceDay.WpfUi.Infrastructure.DialogViewModelBase< TModel, TResult >	58
Exception	
RaceDay.Domain.Exceptions.CreateRecordException	42
RaceDay.Domain.Exceptions.RecordExistException	140
ICommand	
RaceDay.WpfUi.Infrastructure.RelayCommand	141
System.Windows.Markup.IComponentConnector	
RaceDay.WpfUi.App	22
RaceDay.WpfUi.Controls.AppHeader	23
RaceDay.WpfUi.MainWindow	91
RaceDay.WpfUi.Pages.HomePage	64
RaceDay.WpfUi.Views.AddRacerView	17
RaceDay.WpfUi.Views.CreateRaceDayView	34
RaceDay.WpfUi.Views.DatePickerView	44
RaceDay.WpfUi.Views.DaySummaryView	47

RaceDay.WpfUi.Views.HomeView	66
RaceDay.WpfUi.Views.NewRaceDayView	98
RaceDay.WpfUi.Views.NewRaceView	103
RaceDay.WpfUi.Views.RaceDayRacesView	113
RaceDay.WpfUi.Views.RaceDaySummaryView	114
RaceDay.WpfUi.Views.RaceView	137
RaceDay.WpfUi.Views.RacerView	125
RaceDay.WpfUi.Views.RacesSummaryView	129
RaceDay.Domain.Interfaces.ICreateRaceDayCommand	71
RaceDay.SQLite.Commands.CreateRaceDayCommand	32
RaceDay.Domain.Interfaces.IDaySummaryQuery	76
RaceDay.SQLite.Queries.DaySummaryQuery	45
RaceDay.Domain.Interfaces.IDeleteRaceLapCommand	77
RaceDay.SQLite.Commands.DeleteRaceLapCommand	51
RaceDay.Domain.Interfaces.IDeleteRaceRacerCommand	78
RaceDay.SQLite.Commands.DeleteRaceRacerCommand	53
RaceDay.Domain.Interfaces.IExchangeDataCommand< T >	79
RaceDay.Domain.Interfaces.IExchangeDataCommand< RaceEntity?>	79
RaceDay.Domain.Interfaces.ICreateRaceCommand	70
RaceDay.SQLite.Commands.CreateRaceCommand	30
RaceDay.Domain.Interfaces.IExchangeDataCommand< RaceLapEntity >	79
RaceDay.Domain.Interfaces.ICreateRacerLapCommand	74
RaceDay.SQLite.Commands.CreateRacerLapCommand	40
RaceDay.Domain.Interfaces.IExchangeDataCommand< RaceRacerEntity?>	79
RaceDay.Domain.Interfaces.ICreateRaceRacerCommand	72
RaceDay.SQLite.Commands.CreateRaceRacerCommand	35
RaceDay.Domain.Interfaces.IExchangeDataCommand< RacerEntity?>	79
RaceDay.Domain.Interfaces.ICreateRacerCommand	73
RaceDay.SQLite.Commands.CreateRacerCommand	38
RaceDay.WpfUi.Interfaces.INavigableViewModel	80
RaceDay.WpfUi.ViewModels.AddRacerViewModel	18
RaceDay.WpfUi.ViewModels.HomeViewModel	67
INotifyDataErrorInfo	
RaceDay.WpfUi.Infrastructure.ObservableObjectWithValidation	110
RaceDay.WpfUi.Models.NewRaceDayModel	95
RaceDay.WpfUi.Models.RacerModel	120
INotifyPropertyChanged	
RaceDay.WpfUi.Infrastructure.ObservableObject	107
RaceDay.WpfUi.Infrastructure.DialogViewModelBase< RaceModel >	58
RaceDay.WpfUi.ViewModels.AddRacerViewModel	18
RaceDay.WpfUi.Infrastructure.DialogViewModelBase< NewRaceDayModel, DaySummaryModel >	58
RaceDay.WpfUi.ViewModels.NewRaceDayViewModel	99
RaceDay.WpfUi.Infrastructure.DialogViewModelBase< NewRaceModel, RaceSummaryModel >	58
RaceDay.WpfUi.ViewModels.NewRaceViewModel	104
RaceDay.WpfUi.Infrastructure.DialogViewModelBase< TModel, TResult >	58
RaceDay.WpfUi.Infrastructure.ObservableObjectWithValidation	110
RaceDay.WpfUi.Infrastructure.ViewModelBase	145
RaceDay.WpfUi.ViewModels.DaySummaryViewModel	48
RaceDay.WpfUi.ViewModels.HomeViewModel	67
RaceDay.WpfUi.ViewModels.MainViewModel	89
RaceDay.WpfUi.ViewModels.RaceViewModel	138
RaceDay.WpfUi.ViewModels.RacesSummaryViewModel	130
RaceDay.WpfUi.Models.NewRaceModel	102
RaceDay.WpfUi.Models.RaceModel	115
RaceDay.WpfUi.Models.RacerLapModel	117

RaceDay.WpfUi.Services.DialogService	55
RaceDay.WpfUi.Services.NavigationService	92
RaceDay.WpfUi.ViewModels.RacerViewModel	126
System.Windows.Markup.InternalTypeHelper	
XamlGeneratedNamespace.GeneratedInternalTypeHelper	63
RaceDay.Domain.Interfaces.IRacerLapQuery	86
RaceDay.SqlLite.Queries.RacerLapQuery	118
RaceDay.Domain.Interfaces.IRacersQuery	87
RaceDay.SqlLite.Queries.RacersQuery	123
RaceDay.Domain.Interfaces.IRaceSummaryQuery	88
RaceDay.SqlLite.Queries.RaceSummaryQuery	134
IValueConverter	
RaceDay.WpfUi.Converters.EqualityToVisibilityConverter	61
RaceDay.WpfUi.Converters.InverseBooleanConverter	83
RaceDay.WpfUi.Converters.InverseEqualityToVisibilityConverter	85
RaceDay.WpfUi.Converters.RowIndexConverter	143
MarkupExtension	
RaceDay.WpfUi.Extensions.Int32Extension	82
System.Windows.Controls.Page	
RaceDay.WpfUi.Pages.HomePage	64
RaceDay.WpfUi.Models.RaceSummaryModel	133
System.Windows.Controls.UserControl	
RaceDay.WpfUi.Controls.AppHeader	23
RaceDay.WpfUi.Views.AddRacerView	17
RaceDay.WpfUi.Views.CreateRaceDayView	34
RaceDay.WpfUi.Views.DatePickerView	44
RaceDay.WpfUi.Views.DaySummaryView	47
RaceDay.WpfUi.Views.HomeView	66
RaceDay.WpfUi.Views.NewRaceDayView	98
RaceDay.WpfUi.Views.NewRaceView	103
RaceDay.WpfUi.Views.RaceDayRacesView	113
RaceDay.WpfUi.Views.RaceDaySummaryView	114
RaceDay.WpfUi.Views.RaceView	137
RaceDay.WpfUi.Views.RacerView	125
RaceDay.WpfUi.Views.RacesSummaryView	129
UserControl	
RaceDay.WpfUi.Controls.AppHeader	23
ValidationRule	
RaceDay.WpfUi.ValidationRules.FloatValidationRule	62
System.Windows.Window	
RaceDay.WpfUi.MainWindow	91
Window	
RaceDay.WpfUi.MainWindow	91

Chapter 3

Class Index

3.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

RaceDay.WpfUi.Views.AddRacerView	
AddRacerView	17
RaceDay.WpfUi.ViewModels.AddRacerViewModel	
A view model providing data and logic for the Add Racer view	18
RaceDay.WpfUi.App	
Interaction logic for App.xaml	22
RaceDay.WpfUi.Controls.AppHeader	
Interaction logic for AppHeader.xaml The header for the application	23
RaceDay.WpfUi.Startup.Bootstrapper	
The bootstrapper for the application.	
This class is responsible for creating the host and configuring the services	25
RaceDay.WpfUi.Controls.CardDataField	
Interaction logic for CardDataField.xaml A field for displaying data in a card	26
RaceDay.SQLite.Infrastructure.CommandQueryBase	
The base class for all command and query classes	28
RaceDay.SQLite.Commands.CreateRaceCommand	
30	
RaceDay.SQLite.Commands.CreateRaceDayCommand	
32	
RaceDay.WpfUi.Views.CreateRaceDayView	
CreateRaceDayView	34
RaceDay.SQLite.Commands.CreateRaceRacerCommand	
35	
RaceDay.SQLite.Commands.CreateRacerCommand	
38	
RaceDay.SQLite.Commands.CreateRacerLapCommand	
40	
RaceDay.Domain.Exceptions.CreateRecordException	
Exception thrown when a record cannot be created	42
RaceDay.WpfUi.Views.DatePickerView	
DatePickerView	44
RaceDay.SQLite.Queries.DaySummaryQuery	
45	
RaceDay.WpfUi.Views.DaySummaryView	
DaySummaryView	47

RaceDay.WpfUi.ViewModels.DaySummaryViewModel	
A view model providing data and logic for the Day Summary view	48
RaceDay.SQLite.Commands.DeleteRaceLapCommand	
51	
RaceDay.SQLite.Commands.DeleteRaceRacerCommand	
53	
RaceDay.WpfUi.Services.DialogService	
Service for displaying dialogs in the application	55
RaceDay.WpfUi.Infrastructure.DialogViewModelBase< TModel, TResult >	
Base class for view models that are used to display dialogs	58
RaceDay.WpfUi.Converters.EqualityToVisibilityConverter	
Converts a value to a visibility If the value equals the parameter, then visible, otherwise collapsed	61
RaceDay.WpfUi.ValidationRules.FloatValidationRule	
A validation rule for validating float values	62
XamlGeneratedNamespace.GeneratedInternalTypeHelper	
GeneratedInternalTypeHelper	63
RaceDay.WpfUi.Pages.HomePage	
HomePage	64
RaceDay.WpfUi.Views.HomeView	
HomeView	66
RaceDay.WpfUi.ViewModels.HomeViewModel	
A view model providing data and logic for the Home view	67
RaceDay.Domain.Interfaces.ICreateRaceCommand	
A command for creating Race	70
RaceDay.Domain.Interfaces.ICreateRaceDayCommand	
A command for creating Race Day	71
RaceDay.Domain.Interfaces.ICreateRaceRacerCommand	
A command for creating Racer for a Race	72
RaceDay.Domain.Interfaces.ICreateRacerCommand	
A command for creating Racer	73
RaceDay.Domain.Interfaces.ICreateRacerLapCommand	
A command for creating Lap for a Racer	74
RaceDay.Domain.Interfaces.IDaySummaryQuery	
A query for getting Day Summaries	76
RaceDay.Domain.Interfaces.IDeleteRaceLapCommand	
A command for deleting a Lap for a Racer	77
RaceDay.Domain.Interfaces.IDeleteRaceRacerCommand	
A command for deleting a Racer from the Race	78
RaceDay.Domain.Interfaces.IExchangeDataCommand< T >	
A command for creating or updating an entity	79
RaceDay.WpfUi.Interfaces.INavigableViewModel	
Interface for view models that need to be notified when navigated to	80
RaceDay.WpfUi.Extensions.Int32Extension	
Markup extension to allow for int32 values in xaml	82
RaceDay.WpfUi.Converters.InverseBooleanConverter	
Converts a boolean to its inverse	83
RaceDay.WpfUi.Converters.InverseEqualityToVisibilityConverter	
Converts a value to a visibility If the value equals the parameter, then collapsed, otherwise visible	85
RaceDay.Domain.Interfaces.IRacerLapQuery	
A query to retrieve Laps for a Racer	86
RaceDay.Domain.Interfaces.IRacersQuery	
A query for getting Racers	87
RaceDay.Domain.Interfaces.IRaceSummaryQuery	
A query for Race summary	88
RaceDay.WpfUi.ViewModels.MainViewModel	
A view model providing data and logic for the Main view	89
RaceDay.WpfUi.MainWindow	
Interaction logic for MainWindow.xaml	91

RaceDay.WpfUi.Services.NavigationService	
Service for navigating between views in the application	92
RaceDay.WpfUi.Models.NewRaceDayModel	
A model for creating new Race Days	95
RaceDay.WpfUi.Views.NewRaceDayView	
NewRaceDayView	98
RaceDay.WpfUi.ViewModels.NewRaceDayViewModel	
A view model providing data and logic for view for creating new Race Days	99
RaceDay.WpfUi.Models.NewRaceModel	
Model for creating new Races	102
RaceDay.WpfUi.Views.NewRaceView	
NewRaceView	103
RaceDay.WpfUi.ViewModels.NewRaceViewModel	
A view model providing data and logic for a view for creating new Races	104
RaceDay.WpfUi.Infrastructure.ObservableObject	
Base class for observable objects Implements INotifyPropertyChanged	107
RaceDay.WpfUi.Infrastructure.ObservableObjectWithValidation	
Base class for observable objects with validation Implements INotifyPropertyChanged Implements INotifyDataErrorInfo	110
RaceDay.WpfUi.Views.RaceDayRacesView	
RaceDayRacesView	113
RaceDay.WpfUi.Views.RaceDaySummaryView	
RaceDaySummaryView	114
RaceDay.WpfUi.Models.RaceModel	
A model of the Race	115
RaceDay.WpfUi.Models.RacerLapModel	
A model of the Racer Lap	117
RaceDay.SqlLite.Queries.RacerLapQuery	
118	
RaceDay.WpfUi.Models.RacerModel	
Model for Racer	120
RaceDay.SqlLite.Queries.RacersQuery	
123	
RaceDay.WpfUi.Views.RacerView	
RacerView	125
RaceDay.WpfUi.ViewModels.RacerViewModel	
A view model providing data and logic for the Racer view	126
RaceDay.WpfUi.Views.RacesSummaryView	
RacesSummaryView	129
RaceDay.WpfUi.ViewModels.RacesSummaryViewModel	
A view model providing data and logic for Races Summary view	130
RaceDay.WpfUi.Models.RaceSummaryModel	
A model for the Race Summary	133
RaceDay.SqlLite.Queries.RaceSummaryQuery	
134	
RaceDay.WpfUi.Views.RaceView	
RaceView	137
RaceDay.WpfUi.ViewModels.RaceViewModel	
A view model providing data and logic for the Race view	138
RaceDay.Domain.Exceptions.RecordExistException	
Exception thrown when a record already exists	140
RaceDay.WpfUi.Infrastructure.RelayCommand	
A command that can be bound to a UI element	141
RaceDay.WpfUi.Converters.RowIndexConverter	
Convenience converter to get the row index of an item in a list	143
RaceDay.WpfUi.Infrastructure.ViewModelBase	
Base class for all view models	145

Chapter 4

Namespace Documentation

4.1 RaceDay Namespace Reference

4.2 RaceDay.Domain Namespace Reference

4.3 RaceDay.Domain.DTOs Namespace Reference

4.4 RaceDay.Domain.Entities Namespace Reference

Variables

- record **DayEntity**
Represents the Day entity.
- **init**
- record **RaceEntity**
Represents the Race Entity.
- record **RaceLapEntity**
Represents the RaceLap entity, which is a record of a lap for a racer within the race.
- record **RacerEntity**
The racer entity.

4.5 RaceDay.Domain.Exceptions Namespace Reference

Classes

- class [CreateRecordException](#)
Exception thrown when a record cannot be created.
- class [RecordExistException](#)
Exception thrown when a record already exists.

4.6 RaceDay.Domain.Interfaces Namespace Reference

Classes

- interface [ICreateRaceCommand](#)
A command for creating Race.
- interface [ICreateRaceDayCommand](#)
A command for creating Race Day.
- interface [ICreateRaceRacerCommand](#)
A command for creating Racer for a Race.
- interface [ICreateRacerCommand](#)
A command for creating Racer.
- interface [ICreateRacerLapCommand](#)
A command for creating Lap for a Racer.
- interface [IDaySummaryQuery](#)
A query for getting Day Summaries.
- interface [IDeleteRaceLapCommand](#)
A command for deleting a Lap for a Racer.
- interface [IDeleteRaceRacerCommand](#)
A command for deleting a Racer from the Race.
- interface [IExchangeDataCommand](#)
A command for creating or updating an entity.
- interface [IRacerLapQuery](#)
A query to retrieve Laps for a Racer.
- interface [IRacersQuery](#)
A query for getting Racers.
- interface [IRaceSummaryQuery](#)
A query for Race summary.

4.7 RaceDay.SQLite Namespace Reference

4.8 RaceDay.SQLite.Commands Namespace Reference

Classes

- class [CreateRaceCommand](#)
- class [CreateRaceDayCommand](#)
- class [CreateRaceRacerCommand](#)
- class [CreateRacerCommand](#)
- class [CreateRacerLapCommand](#)
- class [DeleteRaceLapCommand](#)
- class [DeleteRaceRacerCommand](#)

4.9 RaceDay.SQLite.Infrastructure Namespace Reference

Classes

- class [CommandQueryBase](#)
The base class for all command and query classes.

4.10 RaceDay.SqlLite.Queries Namespace Reference

Classes

- class [DaySummaryQuery](#)
- class [RacerLapQuery](#)
- class [RacersQuery](#)
- class [RaceSummaryQuery](#)

4.11 RaceDay.WpfUi Namespace Reference

Classes

- class [App](#)
Interaction logic for App.xaml.
- class [MainWindow](#)
Interaction logic for MainWindow.xaml.

4.12 RaceDay.WpfUi.Controls Namespace Reference

Classes

- class [AppHeader](#)
Interaction logic for AppHeader.xaml The header for the application.
- class [CardDataField](#)
Interaction logic for CardDataField.xaml A field for displaying data in a card.

4.13 RaceDay.WpfUi.Converters Namespace Reference

Classes

- class [EqualityToVisibilityConverter](#)
Converts a value to a visibility If the value equals the parameter, then visible, otherwise collapsed.
- class [InverseBooleanConverter](#)
Converts a boolean to its inverse.
- class [InverseEqualityToVisibilityConverter](#)
Converts a value to a visibility If the value equals the parameter, then collapsed, otherwise visible.
- class [RowIndexConverter](#)
Convenience converter to get the row index of an item in a list.

4.14 RaceDay.WpfUi.Extensions Namespace Reference

Classes

- class [Int32Extension](#)
Markup extension to allow for int32 values in xaml.

4.15 RaceDay.WpfUi.Infrastructure Namespace Reference

Classes

- class [DialogViewModelBase](#)
Base class for view models that are used to display dialogs.
- class [ObservableObject](#)
Base class for observable objects Implements INotifyPropertyChanged
- class [ObservableObjectWithValidation](#)
*Base class for observable objects with validation
Implements INotifyPropertyChanged
Implements INotifyDataErrorInfo*
- class [RelayCommand](#)
A command that can be bound to a UI element.
- class [ViewModelBase](#)
Base class for all view models.

4.16 RaceDay.WpfUi.Interfaces Namespace Reference

Classes

- interface [INavigableViewModel](#)
Interface for view models that need to be notified when navigated to.

4.17 RaceDay.WpfUi.Models Namespace Reference

Classes

- class [NewRaceDayModel](#)
A model for creating new Race Days.
- class [NewRaceModel](#)
Model for creating new Races.
- class [RaceModel](#)
A model of the Race.
- class [RacerLapModel](#)
A model of the Racer Lap.
- class [RacerModel](#)
Model for Racer.
- class [RaceSummaryModel](#)
A model for the Race Summary.

4.18 RaceDay.WpfUi.Pages Namespace Reference

Classes

- class [HomePage](#)
HomePage.

4.19 RaceDay.WpfUi.Services Namespace Reference

Classes

- class [DialogService](#)
Service for displaying dialogs in the application.
- class [NavigationService](#)
Service for navigating between views in the application.

4.20 RaceDay.WpfUi.StartUp Namespace Reference

Classes

- class [Bootstrapper](#)
*The bootstrapper for the application.
This class is responsible for creating the host and configuring the services.*

4.21 RaceDay.WpfUi.ValidationRules Namespace Reference

Classes

- class [FloatValidationRule](#)
A validation rule for validating float values.

4.22 RaceDay.WpfUi.ViewModels Namespace Reference

Classes

- class [AddRacerViewModel](#)
A view model providing data and logic for the Add Racer view.
- class [DaySummaryViewModel](#)
A view model providing data and logic for the Day Summary view.
- class [HomeViewModel](#)
A view model providing data and logic for the Home view.
- class [MainViewModel](#)
A view model providing data and logic for the Main view.
- class [NewRaceDayViewModel](#)
A view model providing data and logic for view for creating new Race Days.
- class [NewRaceViewModel](#)
A view model providing data and logic for a view for creating new Races.
- class [RacerViewModel](#)
A view model providing data and logic for the Racer view.
- class [RacesSummaryViewModel](#)
A view model providing data and logic for Races Summary view.
- class [RaceViewModel](#)
A view model providing data and logic for the Race view.

4.23 RaceDay.WpfUi.Views Namespace Reference

Classes

- class [AddRacerView](#)
AddRacerView.
- class [CreateRaceDayView](#)
CreateRaceDayView.
- class [DatePickerView](#)
DatePickerView.
- class [DaySummaryView](#)
DaySummaryView.
- class [HomeView](#)
HomeView.
- class [NewRaceDayView](#)
NewRaceDayView.
- class [NewRaceView](#)
NewRaceView.
- class [RaceDayRacesView](#)
RaceDayRacesView.
- class [RaceDaySummaryView](#)
RaceDaySummaryView.
- class [RacerView](#)
RacerView.
- class [RacesSummaryView](#)
RacesSummaryView.
- class [RaceView](#)
RaceView.

4.24 XamlGeneratedNamespace Namespace Reference

Classes

- class [GeneratedInternalTypeHelper](#)
GeneratedInternalTypeHelper.

Chapter 5

Class Documentation

5.1 RaceDay.WpfUi.Views.AddRacerView Class Reference

AddRacerView.

Inheritance diagram for RaceDay.WpfUi.Views.AddRacerView:

Collaboration diagram for RaceDay.WpfUi.Views.AddRacerView:

Public Member Functions

- void **InitializeComponent** ()
InitializeComponent.
- void **InitializeComponent** ()
InitializeComponent.
- void **InitializeComponent** ()
InitializeComponent.

5.1.1 Detailed Description

AddRacerView.

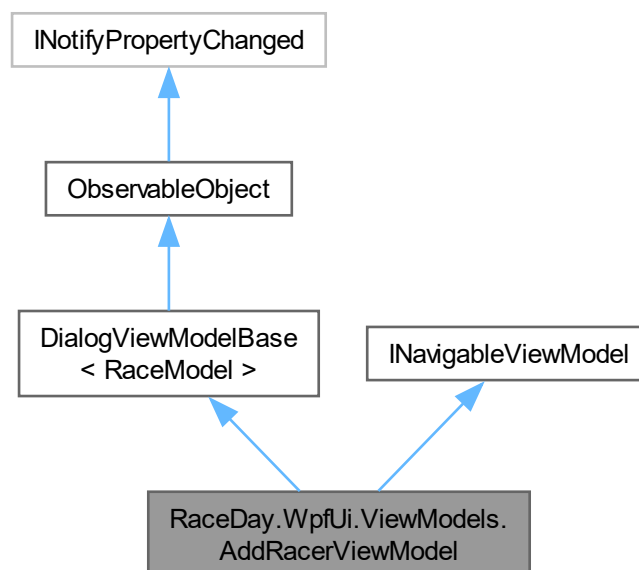

The documentation for this class was generated from the following files:

- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/obj/Debug/net6.0-windows/Views/AddRacerView.g.cs
- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/obj/Debug/net6.0-windows/Views/AddRacerView.g.i.cs
- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/obj/Release/net6.0-windows/Views/AddRacerView.g.cs
- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/Views/AddRacerView.xaml.cs

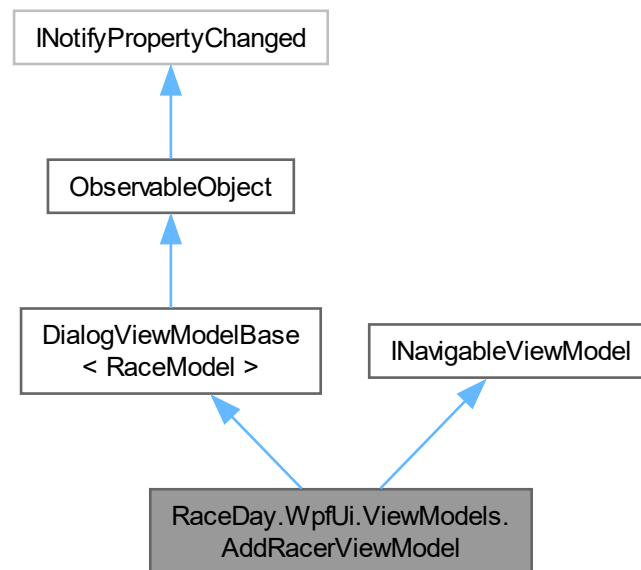

5.2 RaceDay.WpfUi.ViewModels.AddRacerViewModel Class Reference

A view model providing data and logic for the Add Racer view.

Inheritance diagram for RaceDay.WpfUi.ViewModels.AddRacerViewModel:

Collaboration diagram for RaceDay.WpfUi.ViewModels.AddRacerViewModel:

Public Member Functions

- [AddRacerViewModel](#) ([IRacersQuery](#) racersQuery, [ICreateRacerCommand](#) createRacerCommand, [ICreateRaceRacerCommand](#) createRaceRacerCommand, [IDeleteRaceRacerCommand](#) deleteRaceRacerCommand)
 - Initializes a new instance of the AddRacerViewModel class.*
- void [OnNavigatedTo](#) ()
 - Called when the view model is navigated to.*

Public Member Functions inherited from

[RaceDay.WpfUi.Infrastructure.DialogViewModelBase< RaceModel >](#)

- void **OpenDialog** ()
 - Opens the dialog.*
- void **CloseDialog** (object? o=null)
 - Closes the dialog.*
- void [OnNavigatedTo](#) ()
 - Called when the view model is navigated to.*

Properties

- [RacerModel](#) **NewRacer** [get]
The new racer to be added.
- ObservableCollection< [RacerModel](#) > **AllRacers** = new() [get]
A collection of all racers within the system.
- ObservableCollection< [RacerModel](#) > **SelectedRacers** = new() [get]
A collection of racers selected for the Race.
- ICommand **CreateNewRacerCommand** [get]
A command for creating a new racer.
- ICommand **CancelNewRacerCommand** [get]
A command for cancelling the creation of a new racer.
- ICommand **CloseCommand** [get]
A command for closing the dialog.
- ICommand **RemoveRacersCommand** [get]
A command for removing a racer from selection.
- ICommand **AddSelectedRacersCommand** [get]
A command for adding a racer to selection.

Properties inherited from

[RaceDay.WpfUi.Infrastructure.DialogViewModelBase](#)< [RaceModel](#) >

- string **ErrorMessage** [get, protected set]
The error message to display in the dialog.
- bool **DisplayError** [get]
Whether or not to display the error message in the dialog.
- bool **DialogHostIsOpen** [get]
Indicates whether or not the dialog is open. This is used to bind to the DialogHost.IsOpen property. Dialog closes when this is set to false.
- virtual ? DialogClosingEventHandler **DialogClosingHandler** [get, set]
The dialog closing handler. This is used to bind to the DialogHost.DialogClosing attached property. This can be used to prevent the dialog from closing or implement custom logic when the dialog closes.
- TModel **Model** [get, set]
The result that is returned when the dialog closes. If no value is set, the dialog is assumed to have been cancelled.
- TResult? **Result** [get, set]
The result that is returned when the dialog closes. If no value is set, the dialog is assumed to have been cancelled.

Additional Inherited Members

Static Public Member Functions inherited from

[RaceDay.WpfUi.Infrastructure.DialogViewModelBase](#)< [RaceModel](#) >

- static bool **CanCloseDialog** (object? o)

Protected Member Functions inherited from

[RaceDay.WpfUi.Infrastructure.ObservableObject](#)

- virtual void **OnPropertyChanged** ([CallerMemberName] string? propertyName=null)
Raises the PropertyChanged event.
- virtual bool **SetField**< T > (ref T field, T value, [CallerMemberName] string? propertyName=null)
Sets the field and raises the PropertyChanged event if the value has changed.

Events inherited from [RaceDay.WpfUi.Infrastructure.ObservableObject](#)

- PropertyChangedEventHandler? **PropertyChanged**

5.2.1 Detailed Description

A view model providing data and logic for the Add Racer view.

5.2.2 Constructor & Destructor Documentation

5.2.2.1 AddRacerViewModel()

```
RaceDay.WpfUi.ViewModels.AddRacerViewModel.AddRacerViewModel (
    IRacersQuery racersQuery,
    ICreateRacerCommand createRacerCommand,
    ICreateRaceRacerCommand createRaceRacerCommand,
    IDeleteRaceRacerCommand deleteRaceRacerCommand )
```

Initializes a new instance of the AddRacerViewModel class.

Parameters

<i>racersQuery</i>	A query for retrieving racers
<i>createRacerCommand</i>	A command for creating a racer
<i>createRaceRacerCommand</i>	A command for adding a Racer to a Race
<i>deleteRaceRacerCommand</i>	A command for deleting a Racer from a Race

Here is the call graph for this function:

5.2.3 Member Function Documentation

5.2.3.1 OnNavigatedTo()

```
void RaceDay.WpfUi.ViewModels.AddRacerViewModel.OnNavigatedTo ( )
```

Called when the view model is navigated to.

Implements [RaceDay.WpfUi.Interfaces.INavigableViewModel](#).

The documentation for this class was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/ViewModels/AddRacerViewModel.cs

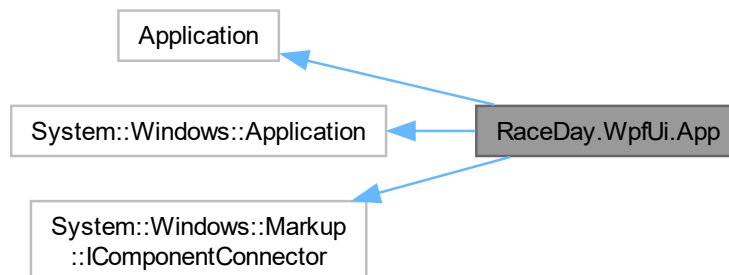

5.3 RaceDay.WpfUi.App Class Reference

Interaction logic for App.xaml.

Inheritance diagram for RaceDay.WpfUi.App:

Collaboration diagram for RaceDay.WpfUi.App:

Public Member Functions

- void **InitializeComponent** ()
InitializeComponent.
- void **InitializeComponent** ()
InitializeComponent.
- void **InitializeComponent** ()
InitializeComponent.

Static Public Member Functions

- static void **Main** (string[] args)
The main entry point for the application.

Protected Member Functions

- override void **OnStartup** (StartupEventArgs e)

5.3.1 Detailed Description

Interaction logic for App.xaml.

App.

5.3.2 Member Function Documentation

5.3.2.1 Main()

```
static void RaceDay.WpfUi.App.Main (  
    string[] args ) [static]
```

The main entry point for the application.

Parameters

<i>args</i>	The command line arguments
-------------	----------------------------

Here is the call graph for this function:

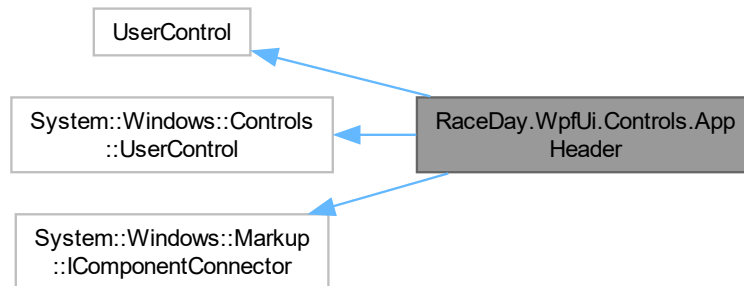

The documentation for this class was generated from the following files:

- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/App.xaml.cs
- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/obj/Debug/net6.0-windows/App.g.cs
- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/obj/Debug/net6.0-windows/App.g.i.cs
- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/obj/Release/net6.0-windows/App.g.cs

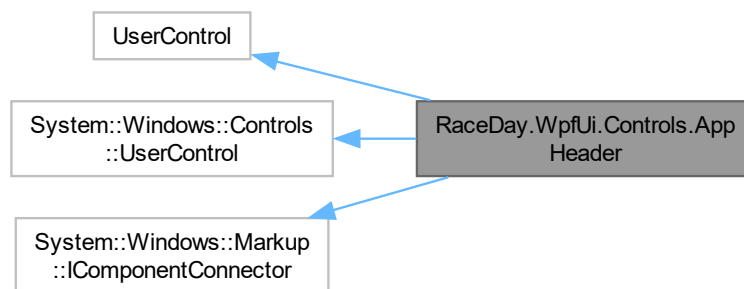

5.4 RaceDay.WpfUi.Controls.AppHeader Class Reference

Interaction logic for AppHeader.xaml The header for the application.

Inheritance diagram for RaceDay.WpfUi.Controls.AppHeader:

Collaboration diagram for RaceDay.WpfUi.Controls.AppHeader:

Public Member Functions

- **AppHeader ()**
Initializes a new instance of the AppHeader class.
- **void InitializeComponent ()**
InitializeComponent.
- **void InitializeComponent ()**
InitializeComponent.
- **void InitializeComponent ()**
InitializeComponent.

5.4.1 Detailed Description

Interaction logic for AppHeader.xaml The header for the application.

AppHeader.

The documentation for this class was generated from the following files:

- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/Controls/AppHeader.xaml.cs
- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/obj/Debug/net6.0-windows/Controls/AppHeader.g.cs
- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/obj/Debug/net6.0-windows/Controls/AppHeader.g.i.cs
- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/obj/Release/net6.0-windows/Controls/AppHeader.g.cs

5.5 RaceDay.WpfUi.StartUp.Bootstrapper Class Reference

The bootstrapper for the application.

This class is responsible for creating the host and configuring the services.

Static Public Member Functions

- static IHost [Bootstrap](#) (string[] args)
Creates the host and configures the services.

5.5.1 Detailed Description

The bootstrapper for the application.

This class is responsible for creating the host and configuring the services.

5.5.2 Member Function Documentation

5.5.2.1 Bootstrap()

```
static IHost RaceDay.WpfUi.StartUp.Bootstrapper.Bootstrap (
    string[] args ) [static]
```

Creates the host and configures the services.

Parameters

<i>args</i>	The arguments.
-------------	----------------

Here is the call graph for this function:

Here is the caller graph for this function:

The documentation for this class was generated from the following file:

- `D:/Personal/College.RaceDay/src/RaceDay.WpfUi/Startup/Bootstrapper.cs`

5.6 RaceDay.WpfUi.Controls.CardDataField Class Reference

Interaction logic for `CardDataField.xaml` A field for displaying data in a card.

Inheritance diagram for `RaceDay.WpfUi.Controls.CardDataField`:

Collaboration diagram for `RaceDay.WpfUi.Controls.CardDataField`:

Static Public Attributes

- static readonly DependencyProperty [HeaderProperty](#)
The header dependency property.
- static readonly DependencyProperty [ImageSourceProperty](#)
The image source dependency property.
- static readonly DependencyProperty [ValueProperty](#)
The value dependency property.

Properties

- string **Header** [get, set]
Gets or sets the header.
- string **Value** [get, set]
Gets or sets the value.
- ImageSource **ImageSource** [get, set]
Gets or sets the image source.

5.6.1 Detailed Description

Interaction logic for CardDataField.xaml A field for displaying data in a card.

5.6.2 Member Data Documentation

5.6.2.1 HeaderProperty

```
readonly DependencyProperty RaceDay.WpfUi.Controls.CardDataField.HeaderProperty [static]
```

Initial value:

```
= DependencyProperty.Register(  
    nameof(Header), typeof(string), typeof(CardDataField), new PropertyMetadata(default(string)))
```

The header dependency property.

5.6.2.2 ImageSourceProperty

```
readonly DependencyProperty RaceDay.WpfUi.Controls.CardDataField.ImageSourceProperty [static]
```

Initial value:

```
= DependencyProperty.Register(  
    nameof(ImageSource), typeof(ImageSource), typeof(CardDataField), new  
    PropertyMetadata(default(ImageSource)))
```

The image source dependency property.

5.6.2.3 ValueProperty

```
readonly DependencyProperty RaceDay.WpfUi.Controls.CardDataField.ValueProperty [static]
```

Initial value:

```
= DependencyProperty.Register(  
    nameof(Value), typeof(string), typeof(CardDataField), new PropertyMetadata(default(string)))
```

The value dependency property.

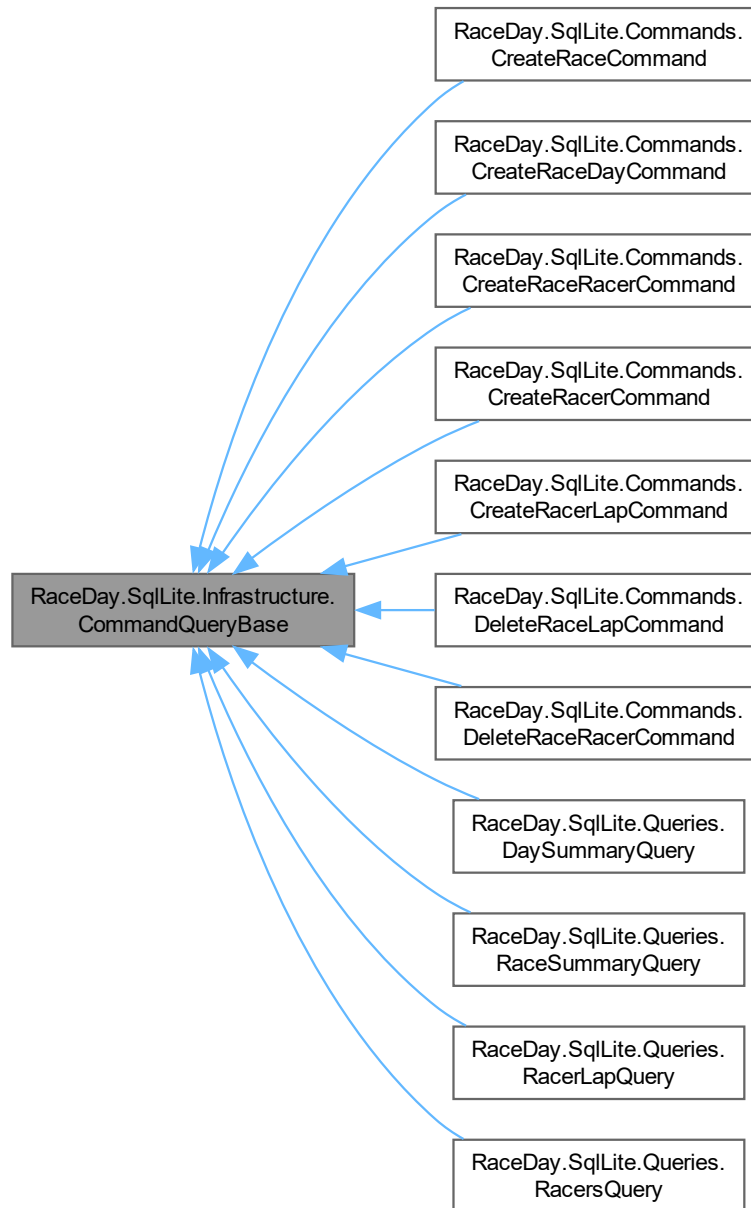

The documentation for this class was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/Controls/CardDataField.cs

5.7 RaceDay.SqlLite.Infrastructure.CommandQueryBase Class Reference

The base class for all command and query classes.

Inheritance diagram for RaceDay.SQLite.Infrastructure.CommandQueryBase:

Protected Member Functions

- `CommandQueryBase` (string dbPath)
Creates a new instance of the CommandQueryBase class.
- `SQLiteConnection CreateConnection ()`
Creates a new SQLiteConnection instance.

Properties

- SQLiteConnectionString **ConnectionString** [get]
The connection string to the database.

5.7.1 Detailed Description

The base class for all command and query classes.

5.7.2 Constructor & Destructor Documentation

5.7.2.1 CommandQueryBase()

```
RaceDay.SQLite.Infrastructure.CommandQueryBase.CommandQueryBase (
    string dbPath ) [protected]
```

Creates a new instance of the CommandQueryBase class.

Parameters

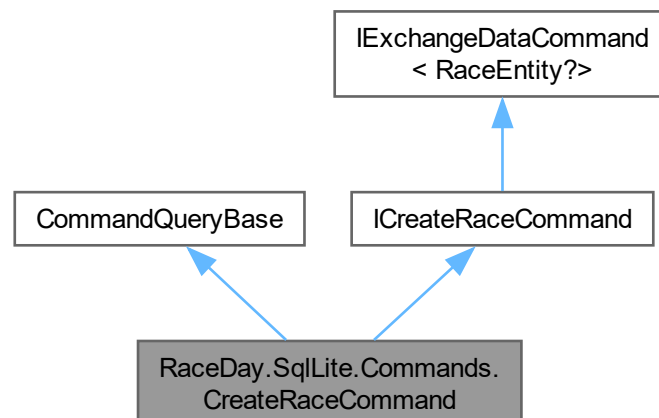

<i>dbPath</i>	The connection string to the database.
---------------	--

The documentation for this class was generated from the following file:

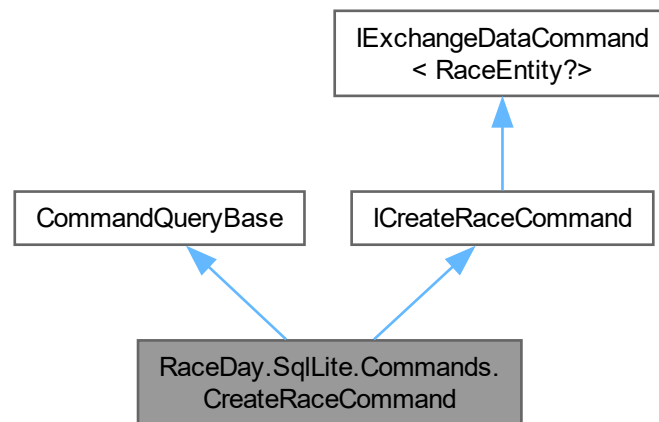

- D:/Personal/College.RaceDay/src/RaceDay.SQLite/Infrastructure/CommandQueryBase.cs

5.8 RaceDay.SQLite.Commands.CreateRaceCommand Class Reference

Inheritance diagram for RaceDay.SQLite.Commands.CreateRaceCommand:

Collaboration diagram for RaceDay.SQLite.Commands.CreateRaceCommand:

Public Member Functions

- **CreateRaceCommand** (string connectionString)
- RaceEntity? **Execute** (RaceEntity? entity)

Public Member Functions inherited from

[RaceDay.Domain.Interfaces.IExchangeDataCommand< RaceEntity?>](#)

- T? [Execute](#) (T entity)
Creates or Updates an entity and returns the new record.

Additional Inherited Members

Protected Member Functions inherited from

[RaceDay.SQLite.Infrastructure.CommandQueryBase](#)

- [CommandQueryBase](#) (string dbPath)
Creates a new instance of the CommandQueryBase class.
- SQLiteConnection **CreateConnection** ()
Creates a new SQLiteConnection instance.

Properties inherited from [RaceDay.SQLite.Infrastructure.CommandQueryBase](#)

- SQLiteConnectionString **ConnectionString** [get]
The connection string to the database.

5.8.1 Detailed Description

The documentation for this class was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.SqlLite/Commands/CreateRaceCommand.cs

5.9 RaceDay.SqlLite.Commands.CreateRaceDayCommand Class Reference

Inheritance diagram for RaceDay.SqlLite.Commands.CreateRaceDayCommand:

Collaboration diagram for RaceDay.SqlLite.Commands.CreateRaceDayCommand:

Public Member Functions

- **CreateRaceDayCommand** (string connectionString)
- DayEntity? [Execute](#) (DayEntity entity)
Creates a new Race Day record and returns the new record.

Parameters

entity	Record to create
--------	------------------

- DayEntity? [Execute](#) (DayEntity entity)
Creates a new Race Day record and returns the new record.

Additional Inherited Members**Protected Member Functions inherited from [RaceDay.SQLite.Infrastructure.CommandQueryBase](#)**

- [CommandQueryBase](#) (string dbPath)
Creates a new instance of the CommandQueryBase class.
- SQLiteConnection **CreateConnection** ()
Creates a new SQLiteConnection instance.

Properties inherited from [RaceDay.SQLite.Infrastructure.CommandQueryBase](#)

- SQLiteConnectionString **ConnectionString** [get]
The connection string to the database.

5.9.1 Detailed Description**5.9.2 Member Function Documentation****5.9.2.1 Execute()**

```
DayEntity? RaceDay.SQLite.Commands.CreateRaceDayCommand.Execute (
    DayEntity entity )
```

Creates a new Race Day record and returns the new record.

Parameters

entity	Record to create
--------	------------------

Implements [RaceDay.Domain.Interfaces.ICreateRaceDayCommand](#).

Here is the call graph for this function:

The documentation for this class was generated from the following file:

- `D:/Personal/College.RaceDay/src/RaceDay.SQLite/Commands/CreateRaceDayCommand.cs`

5.10 RaceDay.WpfUi.Views.CreateRaceDayView Class Reference

`CreateRaceDayView`.

Inheritance diagram for `RaceDay.WpfUi.Views.CreateRaceDayView`:

Collaboration diagram for `RaceDay.WpfUi.Views.CreateRaceDayView`:

Public Member Functions

- `void InitializeComponent ()`
InitializeComponent.

5.10.1 Detailed Description

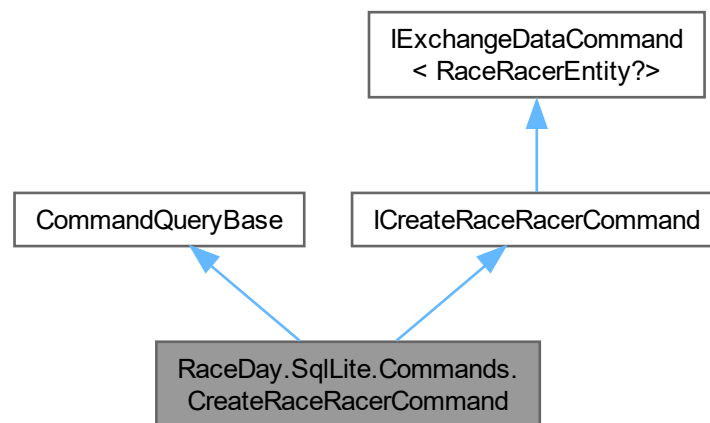

CreateRaceDayView.

The documentation for this class was generated from the following file:

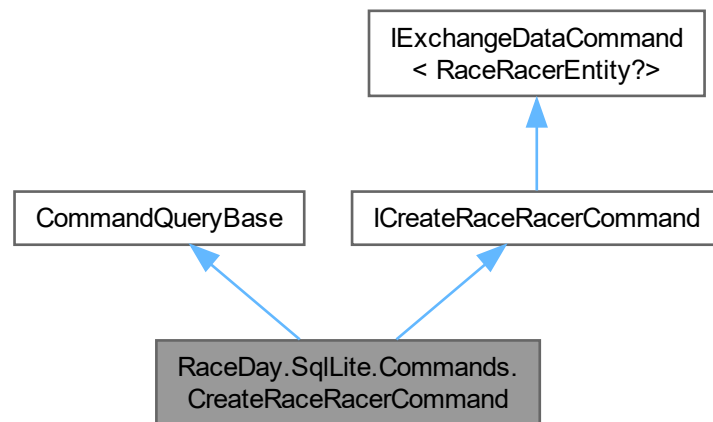

- [D:/Personal/College.RaceDay/src/RaceDay.WpfUi/obj/Debug/net6.0-windows/Views/CreateRaceDayView.g.i.cs](#)

5.11 RaceDay.SQLite.Commands.CreateRaceRacerCommand Class Reference

Inheritance diagram for RaceDay.SQLite.Commands.CreateRaceRacerCommand:

Collaboration diagram for RaceDay.SQLite.Commands.CreateRaceRacerCommand:

Public Member Functions

- **CreateRaceRacerCommand** (string connectionString)
- RaceRacerEntity? **Execute** (RaceRacerEntity? entity)
Adds a racer to race and returns the new record.

Public Member Functions inherited from

[RaceDay.Domain.Interfaces.IExchangeDataCommand< RaceRacerEntity?>](#)

- T? **Execute** (T entity)
Creates or Updates an entity and returns the new record.

Additional Inherited Members

Protected Member Functions inherited from

[RaceDay.SQLite.Infrastructure.CommandQueryBase](#)

- **CommandQueryBase** (string dbPath)
Creates a new instance of the CommandQueryBase class.
- SQLiteConnection **CreateConnection** ()
Creates a new SQLiteConnection instance.

Properties inherited from [RaceDay.SQLite.Infrastructure.CommandQueryBase](#)

- SQLiteConnectionString **ConnectionString** [get]
The connection string to the database.

5.11.1 Detailed Description

5.11.2 Member Function Documentation

5.11.2.1 Execute()

```
RaceRacerEntity? RaceDay.SQLite.Commands.CreateRaceRacerCommand.Execute (
    RaceRacerEntity? entity )
```

Adds a racer to race and returns the new record.

Parameters

<i>entity</i>	Record to create
---------------	------------------

Exceptions

<i>Exception</i>	Throws if record not found
<i>CreateRecordException</i>	Throws if error creating record

Here is the call graph for this function:

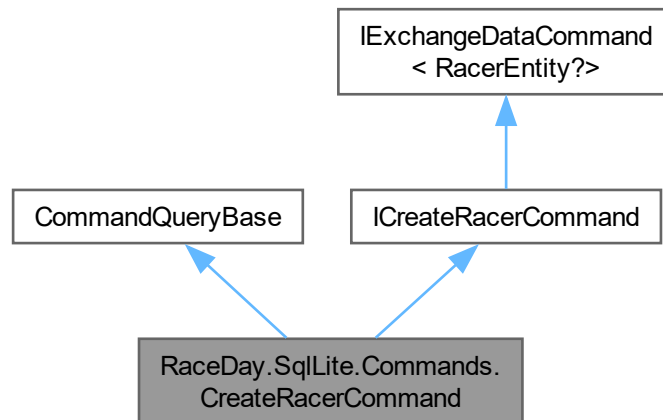

The documentation for this class was generated from the following file:

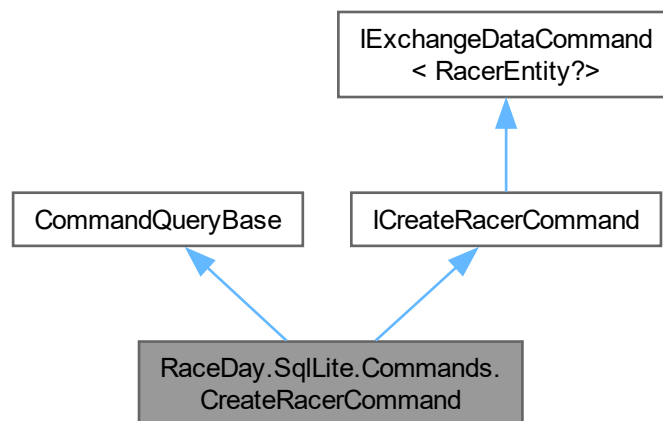

- `D:/Personal/College.RaceDay/src/RaceDay.SQLite/Commands/CreateRaceRacerCommand.cs`

5.12 RaceDay.SQLite.Commands.CreateRacerCommand Class Reference

Inheritance diagram for RaceDay.SQLite.Commands.CreateRacerCommand:

Collaboration diagram for RaceDay.SQLite.Commands.CreateRacerCommand:

Public Member Functions

- **CreateRacerCommand** (string connectionString)
- RacerEntity [Execute](#) (RacerEntity? entity)
Creates a new Racer record and returns the new record.

Public Member Functions inherited from**[RaceDay.Domain.Interfaces.IExchangeDataCommand](#) < [RacerEntity?](#) >**

- T? [Execute](#) (T entity)
Creates or Updates an entity and returns the new record.

Additional Inherited Members**Protected Member Functions inherited from****[RaceDay.SQLite.Infrastructure.CommandQueryBase](#)**

- [CommandQueryBase](#) (string dbPath)
Creates a new instance of the CommandQueryBase class.
- SQLiteConnection **CreateConnection** ()
Creates a new SQLiteConnection instance.

Properties inherited from [RaceDay.SQLite.Infrastructure.CommandQueryBase](#)

- SqlConnectionString **ConnectionString** [get]
The connection string to the database.

5.12.1 Detailed Description**5.12.2 Member Function Documentation****5.12.2.1 Execute()**

```
RacerEntity RaceDay.SQLite.Commands.CreateRacerCommand.Execute (
    RacerEntity? entity )
```

Creates a new Racer record and returns the new record.

Parameters

<i>entity</i>	Racer to create
---------------	-----------------

Exceptions

<i>Exception</i>	Thrown if record not found
<i>CreateRecordException</i>	Thrown if error creating record

Here is the call graph for this function:

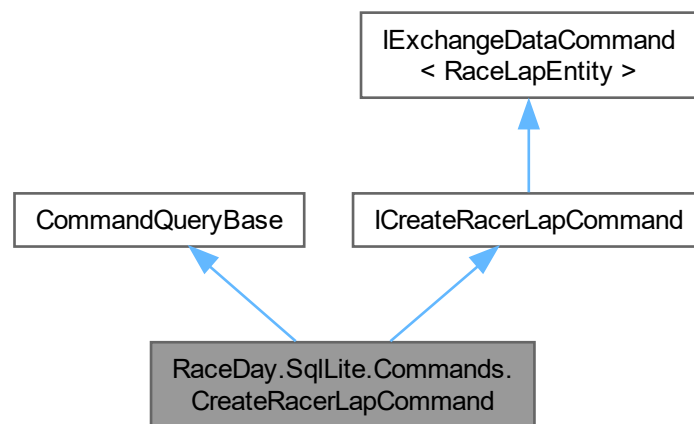

The documentation for this class was generated from the following file:

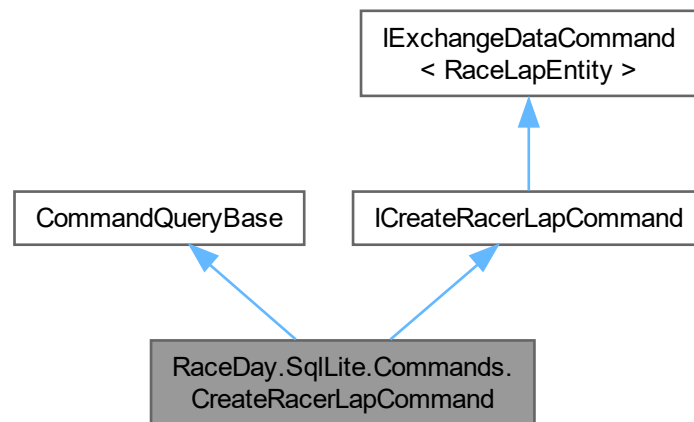

- `D:/Personal/College.RaceDay/src/RaceDay.Sqlite/Commands/CreateRacerCommand.cs`

5.13 RaceDay.Sqlite.Commands.CreateRacerLapCommand Class Reference

Inheritance diagram for `RaceDay.Sqlite.Commands.CreateRacerLapCommand`:

Collaboration diagram for RaceDay.SQLite.Commands.CreateRacerLapCommand:

Public Member Functions

- **CreateRacerLapCommand** (string dbPath)
- RaceLapEntity? **Execute** (RaceLapEntity entity)
Creates a new Lap record and returns the new record.

Public Member Functions inherited from

RaceDay.Domain.Interfaces.IExchangeDataCommand< **RaceLapEntity** >

- T? **Execute** (T entity)
Creates or Updates an entity and returns the new record.

Additional Inherited Members

Protected Member Functions inherited from

RaceDay.SQLite.Infrastructure.CommandQueryBase

- **CommandQueryBase** (string dbPath)
Creates a new instance of the CommandQueryBase class.
- SQLiteConnection **CreateConnection** ()
Creates a new SQLiteConnection instance.

Properties inherited from **RaceDay.SQLite.Infrastructure.CommandQueryBase**

- SQLiteConnectionString **ConnectionString** [get]
The connection string to the database.

5.13.1 Detailed Description

5.13.2 Member Function Documentation

5.13.2.1 Execute()

```
RaceLapEntity? RaceDay.Sqlite.Commands.CreateRacerLapCommand.Execute (
    RaceLapEntity entity )
```

Creates a new Lap record and returns the new record.

Parameters

<i>entity</i>	Lap to create
---------------	---------------

Here is the call graph for this function:

The documentation for this class was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.Sqlite/Commands/CreateRacerLapCommand.cs

5.14 RaceDay.Domain.Exceptions.CreateRecordException Class Reference

Exception thrown when a record cannot be created.

Inheritance diagram for `RaceDay.Domain.Exceptions.CreateRecordException`:

Collaboration diagram for RaceDay.Domain.Exceptions.CreateRecordException:

Public Member Functions

- **CreateRecordException ()**
Initializes a new instance of the CreateRecordException class.
- **CreateRecordException (string message)**
Initializes a new instance of the CreateRecordException class.
- **CreateRecordException (string message, Exception exception)**
Initializes a new instance of the CreateRecordException class.

5.14.1 Detailed Description

Exception thrown when a record cannot be created.

5.14.2 Constructor & Destructor Documentation

5.14.2.1 CreateRecordException() [1/2]

```
RaceDay.Domain.Exceptions.CreateRecordException.CreateRecordException (
    string message )
```

Initializes a new instance of the CreateRecordException class.

Parameters

<i>message</i>	The message that describes the error.
----------------	---------------------------------------

5.14.2.2 CreateRecordException() [2/2]

```
RaceDay.Domain.Exceptions.CreateRecordException.CreateRecordException (
    string message,
    Exception exception )
```

Initializes a new instance of the CreateRecordException class.

Parameters

<i>message</i>	The message that describes the error.
<i>exception</i>	The exception that is the cause of the current exception.

The documentation for this class was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.Domain/Exceptions/CreateRecordException.cs

5.15 RaceDay.WpfUi.Views.DatePickerView Class Reference

DatePickerView.

Inheritance diagram for RaceDay.WpfUi.Views.DatePickerView:

Collaboration diagram for RaceDay.WpfUi.Views.DatePickerView:

Public Member Functions

- void **InitializeComponent** ()
InitializeComponent.

5.15.1 Detailed Description

DatePickerView.

The documentation for this class was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/obj/Debug/net6.0-windows/Views/DatePickerView.g.i.cs

5.16 RaceDay.SqlLite.Queries.DaySummaryQuery Class Reference

Inheritance diagram for RaceDay.SqlLite.Queries.DaySummaryQuery:

Collaboration diagram for RaceDay.SqlLite.Queries.DaySummaryQuery:

Public Member Functions

- **DaySummaryQuery** (string connectionString)
- `IEnumerable< DaySummaryDto > GetAll ()`
Gets all Day Summaries.
- `DaySummaryDto? GetById (int id)`
Gets a Day Summary by Id.

Parameters

id	Id of the Day Summary to get
----	------------------------------

Returns

Day Summary with the given Id or null

- `IEnumerable< DaySummaryDto > GetAll ()`
Gets all Day Summaries.
- `DaySummaryDto? GetById (int id)`
Gets a Day Summary by Id.

Additional Inherited Members
Protected Member Functions inherited from
[RaceDay.SQLite.Infrastructure.CommandQueryBase](#)

- [CommandQueryBase](#) (string dbPath)
Creates a new instance of the CommandQueryBase class.
- `SQLiteConnection CreateConnection ()`
Creates a new SQLiteConnection instance.

Properties inherited from [RaceDay.SQLite.Infrastructure.CommandQueryBase](#)

- `SQLiteConnectionString ConnectionString` [get]
The connection string to the database.

5.16.1 Detailed Description**5.16.2 Member Function Documentation****5.16.2.1 GetAll()**

```
IEnumerable< DaySummaryDto > RaceDay.SQLite.Queries.DaySummaryQuery.GetAll ( )
```

Gets all Day Summaries.

Implements [RaceDay.Domain.Interfaces.IDaySummaryQuery](#).

Here is the call graph for this function:

**5.16.2.2 GetById()**

```
DaySummaryDto? RaceDay.SQLite.Queries.DaySummaryQuery.GetById (
    int id )
```

Gets a Day Summary by Id.

Parameters

<i>id</i>	Id of the Day Summary to get
-----------	------------------------------

Returns

Day Summary with the given Id or null

Implements [RaceDay.Domain.Interfaces.IDaySummaryQuery](#).

Here is the call graph for this function:

The documentation for this class was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.SQLite/Queries/DaySummaryQuery.cs

5.17 RaceDay.WpfUi.Views.DaySummaryView Class Reference

DaySummaryView.

Inheritance diagram for `RaceDay.WpfUi.Views.DaySummaryView`:

Collaboration diagram for `RaceDay.WpfUi.Views.DaySummaryView`:

Public Member Functions

- void **InitializeComponent** ()
InitializeComponent.
- void **InitializeComponent** ()
InitializeComponent.
- void **InitializeComponent** ()
InitializeComponent.

5.17.1 Detailed Description

DaySummaryView.

The documentation for this class was generated from the following files:

- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/obj/Debug/net6.0-windows/Views/DaySummaryView.g.cs
- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/obj/Debug/net6.0-windows/Views/DaySummaryView.g.↔i.cs
- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/obj/Release/net6.0-windows/Views/DaySummaryView.↔g.cs
- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/Views/DaySummaryView.xaml.cs

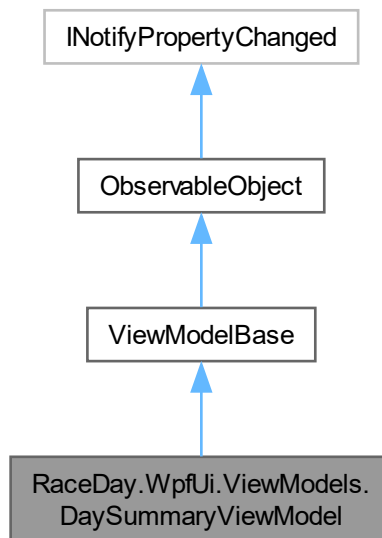

5.18 RaceDay.WpfUi.ViewModels.DaySummaryViewModel Class Reference

A view model providing data and logic for the Day Summary view.

Inheritance diagram for RaceDay.WpfUi.ViewModels.DaySummaryViewModel:

Collaboration diagram for RaceDay.WpfUi.ViewModels.DaySummaryViewModel:

Public Member Functions

- [DaySummaryViewModel](#) ([DialogService](#) dialogService, [IDaySummaryQuery](#) raceDaySummaryQuery)
Creates a new instance of the DaySummaryViewModel class.
- void [LoadData](#) (bool changeSelectedDay=true)
Loads data from the persistence layer.

Properties

- bool **DisplayAsKilometers** [get, set]
Indicates whether to display the distance in miles or kilometers.
- `ObservableCollection< DaySummaryModel >` **RaceDays** = new() [get]
A collection of Race Day summaries.
- `DaySummaryModel?` **SelectedRaceDay** [get, set]
The Race Day selected in the UI.
- string **ViewTitle** [get]
The title of the view.
- `ICommand` **CreateRaceDayCommand** [get]
A command for creating Race Day.

Additional Inherited Members

Protected Member Functions inherited from [RaceDay.WpfUi.Infrastructure.ObservableObject](#)

- virtual void [OnPropertyChanged](#) ([CallerMemberName] string? propertyName=null)
Raises the PropertyChanged event.
- virtual bool [SetField](#)< T > (ref T field, T value, [CallerMemberName] string? propertyName=null)
Sets the field and raises the PropertyChanged event if the value has changed.

Events inherited from [RaceDay.WpfUi.Infrastructure.ObservableObject](#)

- PropertyChangedEventHandler? **PropertyChanged**

5.18.1 Detailed Description

A view model providing data and logic for the Day Summary view.

5.18.2 Constructor & Destructor Documentation

5.18.2.1 DaySummaryViewModel()

```
RaceDay.WpfUi.ViewModels.DaySummaryViewModel.DaySummaryViewModel (
    DialogService dialogService,
    IDaySummaryQuery raceDaySummaryQuery )
```

Creates a new instance of the DaySummaryViewModel class.

Parameters

<i>dialogService</i>	The dialog service
<i>raceDaySummaryQuery</i>	A query for Race Day summaries

5.18.3 Member Function Documentation

5.18.3.1 LoadData()

```
void RaceDay.WpfUi.ViewModels.DaySummaryViewModel.LoadData (
    bool changeSelectedDay = true )
```

Loads data from the persistence layer.

Parameters

<i>changeSelectedDay</i>	Indicates whether to change the selected day
--------------------------	--

Here is the caller graph for this function:

The documentation for this class was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/ViewModels/DaySummaryViewModel.cs

5.19 RaceDay.SQLite.Commands.DeleteRaceLapCommand Class Reference

Inheritance diagram for RaceDay.SQLite.Commands.DeleteRaceLapCommand:

Collaboration diagram for RaceDay.SQLite.Commands.DeleteRaceLapCommand:

Public Member Functions

- **DeleteRaceLapCommand** (string dbPath)
- bool **Execute** (int raceLapId)
Deletes the lap for racer.
- bool **Execute** (int raceLapId)
Deletes the lap for racer.

Additional Inherited Members

Protected Member Functions inherited from [RaceDay.SqlLite.Infrastructure.CommandQueryBase](#)

- [CommandQueryBase](#) (string dbPath)
Creates a new instance of the CommandQueryBase class.
- SQLiteConnection **CreateConnection** ()
Creates a new SQLiteConnection instance.

Properties inherited from [RaceDay.SqlLite.Infrastructure.CommandQueryBase](#)

- SQLiteConnectionString **ConnectionString** [get]
The connection string to the database.

5.19.1 Detailed Description

5.19.2 Member Function Documentation

5.19.2.1 Execute()

```
bool RaceDay.SqlLite.Commands.DeleteRaceLapCommand.Execute (
    int raceLapId )
```

Deletes the lap for racer.

Parameters

<i>race</i> ↔ <i>LapId</i>	Id of the lap to delete
-------------------------------	-------------------------

Returns

True if the lap was deleted, false if not

Implements [RaceDay.Domain.Interfaces.IDeleteRaceLapCommand](#).

Here is the call graph for this function:

The documentation for this class was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.SqlLite/Commands/DeleteRaceLapCommand.cs

5.20 RaceDay.SQLite.Commands.DeleteRaceRacerCommand Class Reference

Inheritance diagram for RaceDay.SQLite.Commands.DeleteRaceRacerCommand:

Collaboration diagram for RaceDay.SQLite.Commands.DeleteRaceRacerCommand:

Public Member Functions

- **DeleteRaceRacerCommand** (string dbPath)
- bool [Execute](#) (int raceId, int racerId)
Deletes racer from race.
- bool [Execute](#) (int raceId, int racerId)
Deletes racer from race.

Additional Inherited Members

Protected Member Functions inherited from [RaceDay.SQLite.Infrastructure.CommandQueryBase](#)

- [CommandQueryBase](#) (string dbPath)
Creates a new instance of the CommandQueryBase class.
- SQLiteConnection **CreateConnection** ()
Creates a new SQLiteConnection instance.

Properties inherited from [RaceDay.SqlLite.Infrastructure.CommandQueryBase](#)

- SQLiteConnectionString **ConnectionString** [get]
The connection string to the database.

5.20.1 Detailed Description

5.20.2 Member Function Documentation

5.20.2.1 Execute()

```
bool RaceDay.SqlLite.Commands.DeleteRaceRacerCommand.Execute (
    int raceId,
    int racerId )
```

Deletes racer from race.

Parameters

<i>raceId</i>	The Race Id to remove the racer from
<i>racerId</i>	The Racer Id to be removed

Returns

True if the racer was deleted, false if not

Exceptions

<i>Exception</i>	Throws if laps remain for racer
------------------	---------------------------------

Implements [RaceDay.Domain.Interfaces.IDeleteRaceRacerCommand](#).

Here is the call graph for this function:

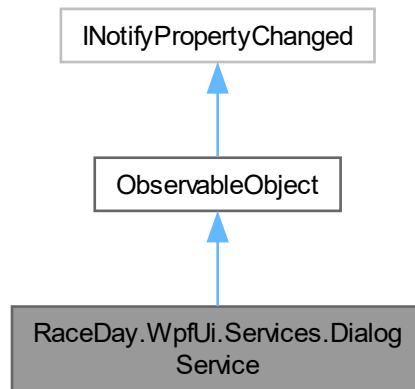

The documentation for this class was generated from the following file:

- `D:/Personal/College.RaceDay/src/RaceDay.SqlLite/Commands/DeleteRaceRacerCommand.cs`

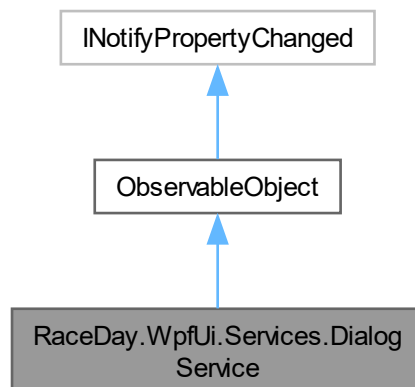

5.21 RaceDay.WpfUi.Services.DialogService Class Reference

Service for displaying dialogs in the application.

Inheritance diagram for RaceDay.WpfUi.Services.DialogService:

Collaboration diagram for RaceDay.WpfUi.Services.DialogService:

Public Member Functions

- [DialogService](#) (IServiceProvider serviceProvider)
Creates a new instance of the DialogService class.
- `async Task< TResult? > DisplayDialogAsync< TViewModel, TModel, TResult > (TModel model)`
Displays a dialog with the specified view model.
- `async Task DisplayDialogAsync< TViewModel, TModel > (TModel model)`
Displays a dialog with the specified view model.

Properties

- string **DialogHostIdentifier** = "RootDialogHost" [get]
The identifier of the dialog host.
- [DialogViewModelBase](#)? **ActiveDialogViewModel** [get]
A view model currently displayed in the dialog host.

Additional Inherited Members

Protected Member Functions inherited from [RaceDay.WpfUi.Infrastructure.ObservableObject](#)

- virtual void [OnPropertyChanged](#) ([CallerMemberName] string? propertyName=null)
Raises the PropertyChanged event.
- virtual bool [SetField](#)< T > (ref T field, T value, [CallerMemberName] string? propertyName=null)
Sets the field and raises the PropertyChanged event if the value has changed.

Events inherited from [RaceDay.WpfUi.Infrastructure.ObservableObject](#)

- PropertyChangedEventHandler? **PropertyChanged**

5.21.1 Detailed Description

Service for displaying dialogs in the application.

5.21.2 Constructor & Destructor Documentation

5.21.2.1 DialogService()

```
RaceDay.WpfUi.Services.DialogService.DialogService (
    IServiceProvider serviceProvider )
```

Creates a new instance of the DialogService class.

Parameters

<i>serviceProvider</i>	The service provider
------------------------	----------------------

5.21.3 Member Function Documentation

5.21.3.1 DisplayDialogAsync< TViewModel, TModel >()

```
async Task RaceDay.WpfUi.Services.DialogService.DisplayDialogAsync< TViewModel, TModel > (
    TModel model )
```

Displays a dialog with the specified view model.

Parameters

<i>model</i>	The base model containing the data to be displayed.
--------------	---

Template Parameters

<i>TViewModel</i>	The type of the view model.
<i>TModel</i>	The type of the model.

Type Constraints

***TViewModel* : *DialogViewModelBase*<*TModel*>**

TViewModel* : *INavigableViewModel

Here is the call graph for this function:

5.21.3.2 DisplayDialogAsync< TViewModel, TModel, TResult >()

```

async Task< TResult?> RaceDay.WpfUi.Services.DialogService.DisplayDialogAsync< TViewModel,
TModel, TResult > (
    TModel model )
  
```

Displays a dialog with the specified view model.

Parameters

<i>model</i>	The base model containing the data to be displayed.
--------------	---

Template Parameters

<i>TViewModel</i>	The type of the view model.
<i>TModel</i>	The type of the model.
<i>TResult</i>	The type of the result.

Returns

The result specified by the *TResult*

Type Constraints

TViewModel* : *DialogViewModelBase

TViewModel* : *TModel

TViewModel* : *TResult

Here is the call graph for this function:

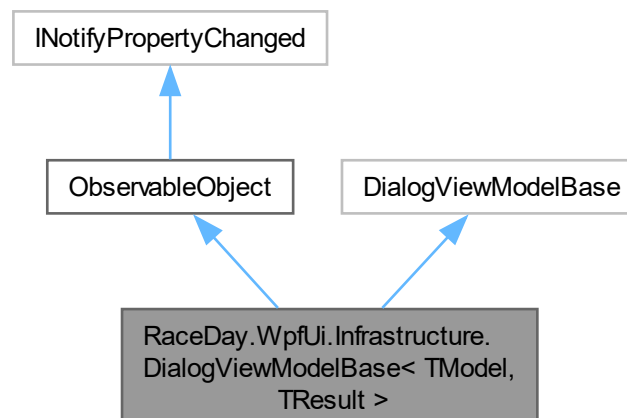

The documentation for this class was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/Services/DialogService.cs

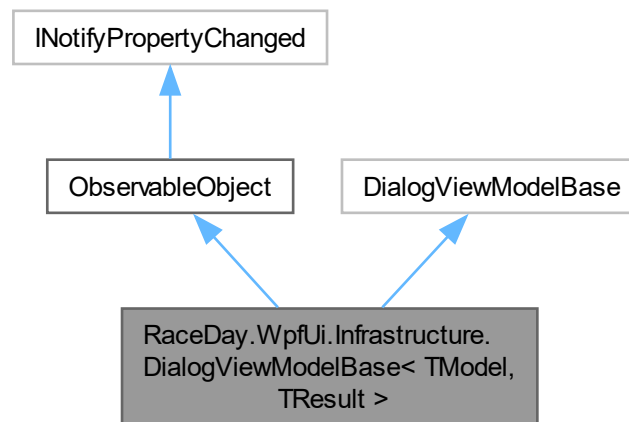

5.22 RaceDay.WpfUi.Infrastructure.DialogViewModelBase< TModel, TResult > Class Template Reference

Base class for view models that are used to display dialogs.

Inheritance diagram for `RaceDay.WpfUi.Infrastructure.DialogViewModelBase< TModel, TResult >`:

Collaboration diagram for RaceDay.WpfUi.Infrastructure.DialogViewModelBase< TModel, TResult >:

Public Member Functions

- void **OpenDialog** ()
Opens the dialog.
- void **CloseDialog** (object? o=null)
Closes the dialog.

Static Public Member Functions

- static bool **CanCloseDialog** (object? o)

Properties

- string **ErrorMessage** [get, protected set]
The error message to display in the dialog.
- bool **DisplayError** [get]
Whether or not to display the error message in the dialog.
- bool **DialogHostIsOpen** [get]
Indicates whether or not the dialog is open. This is used to bind to the DialogHost.IsOpen property. Dialog closes when this is set to false.
- virtual ? DialogClosingEventHandler **DialogClosingHandler** [get, set]
The dialog closing handler. This is used to bind to the DialogHost.DialogClosing attached property. This can be used to prevent the dialog from closing or implement custom logic when the dialog closes.
- TModel **Model** [get, set]
The result that is returned when the dialog closes. If no value is set, the dialog is assumed to have been cancelled.
- TResult? **Result** [get, set]
The result that is returned when the dialog closes. If no value is set, the dialog is assumed to have been cancelled.

Additional Inherited Members

Protected Member Functions inherited from [RaceDay.WpfUi.Infrastructure.ObservableObject](#)

- virtual void [OnPropertyChanged](#) ([CallerMemberName] string? propertyName=null)
Raises the PropertyChanged event.
- virtual bool [SetField< T >](#) (ref T field, T value, [CallerMemberName] string? propertyName=null)
Sets the field and raises the PropertyChanged event if the value has changed.

Events inherited from [RaceDay.WpfUi.Infrastructure.ObservableObject](#)

- PropertyChangedEventHandler? **PropertyChanged**

5.22.1 Detailed Description

Base class for view models that are used to display dialogs.

Base class for view models that are used to display dialogs, with a model and result.

Base class for view models that are used to display dialogs, with a result.

Template Parameters

<i>TModel</i>	A result that is returned when the dialog closes.
---------------	---

Template Parameters

<i>TModel</i>	A model that is used to display data in the dialog.
<i>TResult</i>	A result that is returned when the dialog closes.

5.22.2 Property Documentation

5.22.2.1 Model

```
TModel DialogViewModelBase.Model [get], [set]
```

The result that is returned when the dialog closes. If no value is set, the dialog is assumed to have been cancelled.

The model that is used to display data in the dialog.

The documentation for this class was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/Infrastructure/DialogViewModelBase.cs

5.23 RaceDay.WpfUi.Converters.EqualityToVisibilityConverter Class Reference

Converts a value to a visibility If the value equals the parameter, then visible, otherwise collapsed.

Inheritance diagram for RaceDay.WpfUi.Converters.EqualityToVisibilityConverter:

Collaboration diagram for RaceDay.WpfUi.Converters.EqualityToVisibilityConverter:

Public Member Functions

- object **Convert** (object? value, Type targetType, object parameter, CultureInfo culture)
- object **ConvertBack** (object value, Type targetType, object parameter, CultureInfo culture)

5.23.1 Detailed Description

Converts a value to a visibility If the value equals the parameter, then visible, otherwise collapsed.

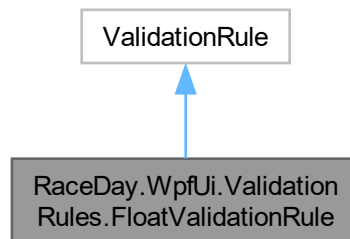

The documentation for this class was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/Converters/EqualityToVisibilityConverter.cs

5.24 RaceDay.WpfUi.ValidationRules.FloatValidationRule Class Reference

A validation rule for validating float values.

Inheritance diagram for RaceDay.WpfUi.ValidationRules.FloatValidationRule:

Collaboration diagram for RaceDay.WpfUi.ValidationRules.FloatValidationRule:

Public Member Functions

- override ValidationResult **Validate** (object value, CultureInfo cultureInfo)

Properties

- float **Min** = 0 [get, set]
The minimum value allowed.
- float? **Max** = null [get, set]
The maximum value allowed.
- string **PropertyName** = "Value" [get, set]
The name of the property being validated.

5.24.1 Detailed Description

A validation rule for validating float values.

The documentation for this class was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/ValidationRules/FloatValidationRule.cs

5.25 XamlGeneratedNamespace.GeneratedInternalTypeHelper Class Reference

GeneratedInternalTypeHelper.

Inheritance diagram for XamlGeneratedNamespace.GeneratedInternalTypeHelper:

Collaboration diagram for XamlGeneratedNamespace.GeneratedInternalTypeHelper:

Protected Member Functions

- override object **CreateInstance** (System.Type type, System.Globalization.CultureInfo culture)
CreateInstance.
- override object **GetPropertyValue** (System.Reflection.PropertyInfo propertyInfo, object target, System.Globalization.CultureInfo culture)
GetPropertyValue.
- override void **SetPropertyValue** (System.Reflection.PropertyInfo propertyInfo, object target, object value, System.Globalization.CultureInfo culture)
SetPropertyValue.
- override System.Delegate **CreateDelegate** (System.Type delegateType, object target, string handler)
CreateDelegate.
- override void **AddEventHandler** (System.Reflection.EventInfo eventInfo, object target, System.Delegate handler)
AddEventHandler.
- override object **CreateInstance** (System.Type type, System.Globalization.CultureInfo culture)
CreateInstance.
- override object **GetPropertyValue** (System.Reflection.PropertyInfo propertyInfo, object target, System.Globalization.CultureInfo culture)
GetPropertyValue.
- override void **SetPropertyValue** (System.Reflection.PropertyInfo propertyInfo, object target, object value, System.Globalization.CultureInfo culture)
SetPropertyValue.
- override System.Delegate **CreateDelegate** (System.Type delegateType, object target, string handler)
CreateDelegate.
- override void **AddEventHandler** (System.Reflection.EventInfo eventInfo, object target, System.Delegate handler)
AddEventHandler.

5.25.1 Detailed Description

GeneratedInternalTypeHelper.

The documentation for this class was generated from the following files:

- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/obj/Debug/net6.0-windows/GeneratedInternalTypeHelper.g.i.cs
- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/obj/Release/net6.0-windows/GeneratedInternalTypeHelper.g.cs

5.26 RaceDay.WpfUi.Pages.HomePage Class Reference

HomePage.

Inheritance diagram for RaceDay.WpfUi.Pages.HomePage:

Collaboration diagram for RaceDay.WpfUi.Pages.HomePage:

Public Member Functions

- void **InitializeComponent** ()
InitializeComponent.

5.26.1 Detailed Description

HomePage.

The documentation for this class was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/obj/Debug/net6.0-windows/Pages/HomePage.g.i.cs

5.27 RaceDay.WpfUi.Views.HomeView Class Reference

HomeView.

Inheritance diagram for RaceDay.WpfUi.Views.HomeView:

Collaboration diagram for RaceDay.WpfUi.Views.HomeView:

Public Member Functions

- void **InitializeComponent** ()
InitializeComponent.
- void **InitializeComponent** ()
InitializeComponent.
- void **InitializeComponent** ()
InitializeComponent.

5.27.1 Detailed Description

HomeView.

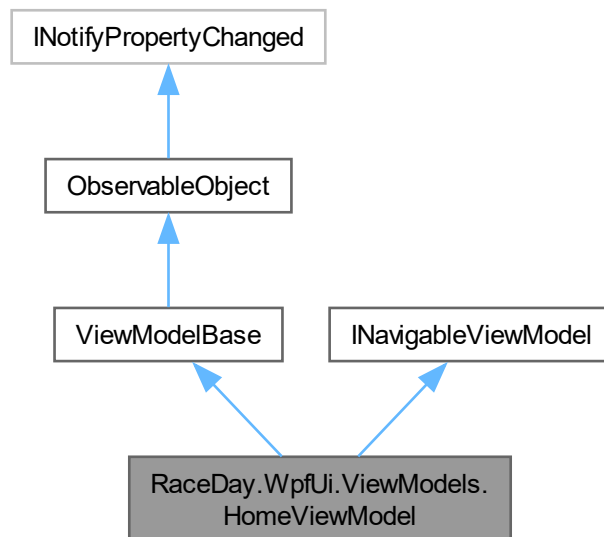

The documentation for this class was generated from the following files:

- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/obj/Debug/net6.0-windows/Views/HomeView.g.cs
- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/obj/Debug/net6.0-windows/Views/HomeView.g.i.cs
- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/obj/Release/net6.0-windows/Views/HomeView.g.cs
- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/Views/HomeView.xaml.cs

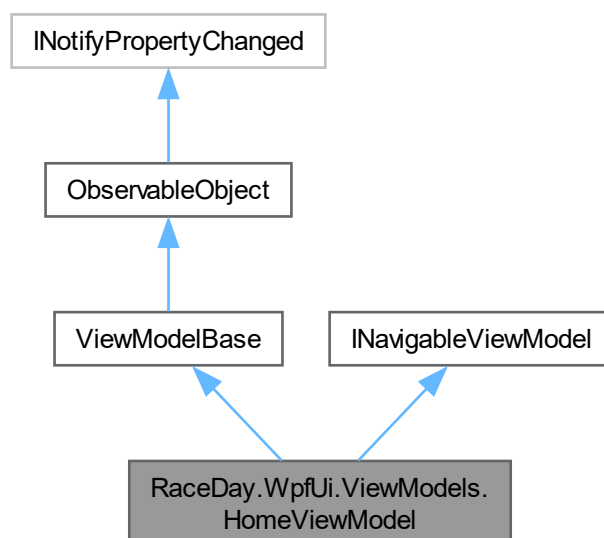

5.28 RaceDay.WpfUi.ViewModels.HomeViewModel Class Reference

A view model providing data and logic for the Home view.

Inheritance diagram for RaceDay.WpfUi.ViewModels.HomeViewModel:

Collaboration diagram for RaceDay.WpfUi.ViewModels.HomeViewModel:

Public Member Functions

- [HomeViewModel](#) ([DaySummaryViewModel](#) raceDaySummaryViewModel, [RacesSummaryViewModel](#) race↔
DayRacesViewModel)
Creates a new instance of the HomeViewModel class.
- void [OnNavigatedTo](#) ()
Called when the view model is navigated to.
- void [OnNavigatedTo](#) ()
Called when the view model is navigated to.

Properties

- [DaySummaryViewModel](#) **RaceDaySummaryViewModel** [get]
A view model providing data and logic for the Day Summary view.
- [RacesSummaryViewModel](#) **RaceDayRacesViewModel** [get]
A view model providing data and logic for the Races Summary view.

Additional Inherited Members

Protected Member Functions inherited from [RaceDay.WpfUi.Infrastructure.ObservableObject](#)

- virtual void [OnPropertyChanged](#) ([CallerMemberName] string? propertyName=null)
Raises the PropertyChanged event.
- virtual bool [SetField](#)< T > (ref T field, T value, [CallerMemberName] string? propertyName=null)
Sets the field and raises the PropertyChanged event if the value has changed.

Events inherited from [RaceDay.WpfUi.Infrastructure.ObservableObject](#)

- PropertyChangedEventHandler? **PropertyChanged**

5.28.1 Detailed Description

A view model providing data and logic for the Home view.

5.28.2 Constructor & Destructor Documentation

5.28.2.1 HomeViewModel()

```
RaceDay.WpfUi.ViewModels.HomeViewModel.HomeViewModel (
    DaySummaryViewModel raceDaySummaryViewModel,
    RacesSummaryViewModel raceDayRacesViewModel )
```

Creates a new instance of the HomeViewModel class.

Parameters

<i>raceDaySummaryViewModel</i>	A view model providing data and logic for the Day Summary view
<i>raceDayRacesViewModel</i>	A view model providing data and logic for the Races Summary view

Here is the call graph for this function:

5.28.3 Member Function Documentation

5.28.3.1 OnNavigatedTo()

```
void RaceDay.WpfUi.ViewModels.HomeViewModel.OnNavigatedTo ( )
```

Called when the view model is navigated to.

Implements [RaceDay.WpfUi.Interfaces.INavigableViewModel](#).

Here is the call graph for this function:

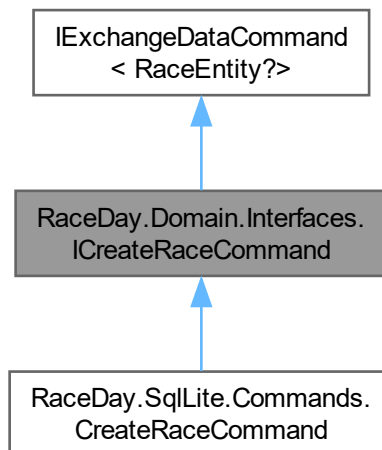

The documentation for this class was generated from the following file:

- `D:/Personal/College.RaceDay/src/RaceDay.WpfUi/ViewModels/HomeViewModel.cs`

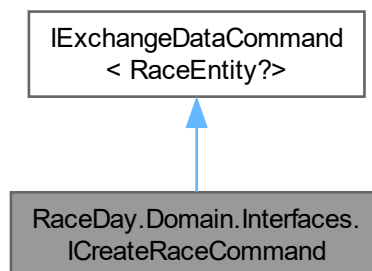

5.29 RaceDay.Domain.Interfaces.ICreateRaceCommand Interface Reference

A command for creating Race.

Inheritance diagram for RaceDay.Domain.Interfaces.ICreateRaceCommand:

Collaboration diagram for RaceDay.Domain.Interfaces.ICreateRaceCommand:

Additional Inherited Members

Public Member Functions inherited from [RaceDay.Domain.Interfaces.IExchangeDataCommand< RaceEntity?>](#)

- T? [Execute](#) (T entity)
Creates or Updates an entity and returns the new record.

5.29.1 Detailed Description

A command for creating Race.

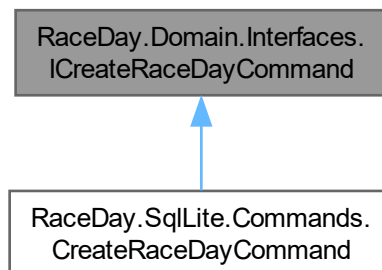

The documentation for this interface was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.Domain/Interfaces/ICreateRaceCommand.cs

5.30 RaceDay.Domain.Interfaces.ICreateRaceDayCommand Interface Reference

A command for creating Race Day.

Inheritance diagram for RaceDay.Domain.Interfaces.ICreateRaceDayCommand:

Public Member Functions

- DayEntity? [Execute](#) (DayEntity entity)
Creates a new Race Day record and returns the new record.

5.30.1 Detailed Description

A command for creating Race Day.

5.30.2 Member Function Documentation

5.30.2.1 Execute()

```
DayEntity? RaceDay.Domain.Interfaces.ICreateRaceDayCommand.Execute (
    DayEntity entity )
```

Creates a new Race Day record and returns the new record.

Parameters

<i>entity</i>	Record to create
---------------	------------------

Implemented in [RaceDay.SqlLite.Commands.CreateRaceDayCommand](#).

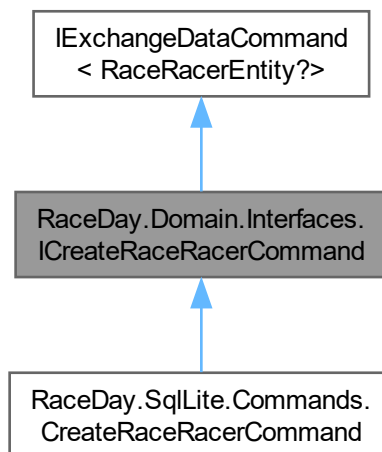

The documentation for this interface was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.Domain/Interfaces/ICreateRaceDayCommand.cs

5.31 RaceDay.Domain.Interfaces.ICreateRaceRacerCommand Interface Reference

A command for creating Racer for a Race.

Inheritance diagram for RaceDay.Domain.Interfaces.ICreateRaceRacerCommand:

Collaboration diagram for RaceDay.Domain.Interfaces.ICreateRaceRacerCommand:

Additional Inherited Members

Public Member Functions inherited from

[RaceDay.Domain.Interfaces.IExchangeDataCommand](#)< [RaceRacerEntity?](#)>

- T? [Execute](#) (T entity)
Creates or Updates an entity and returns the new record.

5.31.1 Detailed Description

A command for creating Racer for a Race.

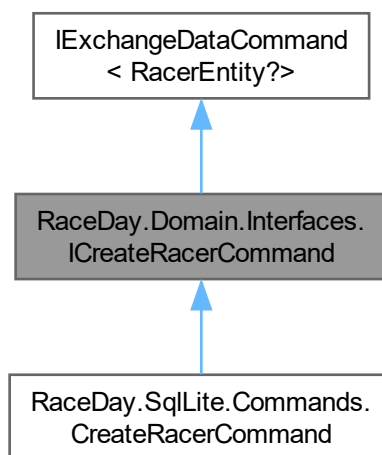

The documentation for this interface was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.Domain/Interfaces/ICreateRaceRacerCommand.cs

5.32 RaceDay.Domain.Interfaces.ICreateRacerCommand Interface Reference

A command for creating Racer.

Inheritance diagram for RaceDay.Domain.Interfaces.ICreateRacerCommand:

Collaboration diagram for RaceDay.Domain.Interfaces.ICreateRacerCommand:

Additional Inherited Members

Public Member Functions inherited from [RaceDay.Domain.Interfaces.IExchangeDataCommand< RacerEntity? >](#)

- T? [Execute](#) (T entity)
Creates or Updates an entity and returns the new record.

5.32.1 Detailed Description

A command for creating Racer.

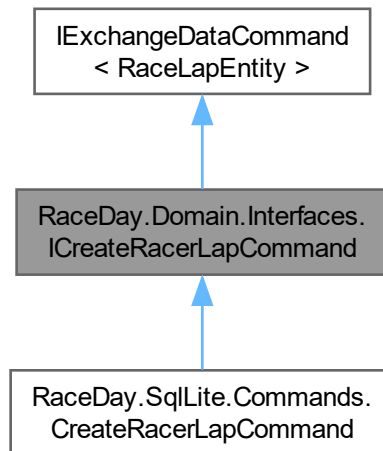

The documentation for this interface was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.Domain/Interfaces/ICreateRacerCommand.cs

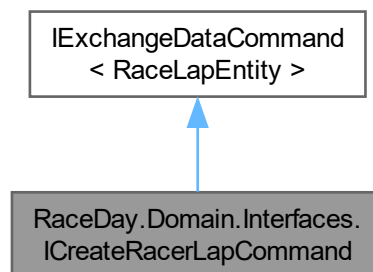

5.33 RaceDay.Domain.Interfaces.ICreateRacerLapCommand Interface Reference

A command for creating Lap for a Racer.

Inheritance diagram for RaceDay.Domain.Interfaces.ICreateRacerLapCommand:

Collaboration diagram for RaceDay.Domain.Interfaces.ICreateRacerLapCommand:

Additional Inherited Members

Public Member Functions inherited from

`RaceDay.Domain.Interfaces.IExchangeDataCommand< RaceLapEntity >`

- T? [Execute](#) (T entity)
Creates or Updates an entity and returns the new record.

5.33.1 Detailed Description

A command for creating Lap for a Racer.

The documentation for this interface was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.Domain/Interfaces/ICreateRacerLapCommand.cs

5.34 RaceDay.Domain.Interfaces.IDaySummaryQuery Interface Reference

A query for getting Day Summaries.

Inheritance diagram for RaceDay.Domain.Interfaces.IDaySummaryQuery:

Public Member Functions

- `IEnumerable< DaySummaryDto > GetAll ()`
Gets all Day Summaries.
- `DaySummaryDto? GetById (int id)`
Gets a Day Summary by Id.

5.34.1 Detailed Description

A query for getting Day Summaries.

5.34.2 Member Function Documentation

5.34.2.1 GetAll()

```
IEnumerable< DaySummaryDto > RaceDay.Domain.Interfaces.IDaySummaryQuery.GetAll ( )
```

Gets all Day Summaries.

Implemented in [RaceDay.Sqlite.Queries.DaySummaryQuery](#).

5.34.2.2 GetById()

```
DaySummaryDto? RaceDay.Domain.Interfaces.IDaySummaryQuery.GetById (
    int id )
```

Gets a Day Summary by Id.

Parameters

<i>id</i>	Id of the Day Summary to get
-----------	------------------------------

Returns

Day Summary with the given Id or null

Implemented in [RaceDay.SQLite.Queries.DaySummaryQuery](#).

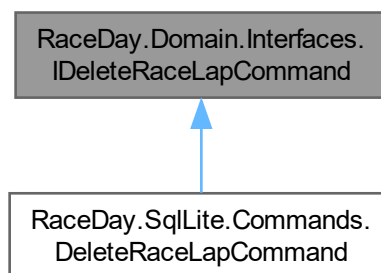

The documentation for this interface was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.Domain/Interfaces/IDaySummaryQuery.cs

5.35 RaceDay.Domain.Interfaces.IDeleteRaceLapCommand Interface Reference

A command for deleting a Lap for a Racer.

Inheritance diagram for RaceDay.Domain.Interfaces.IDeleteRaceLapCommand:

Public Member Functions

- bool [Execute](#) (int raceLapId)
Deletes the lap for racer.

5.35.1 Detailed Description

A command for deleting a Lap for a Racer.

5.35.2 Member Function Documentation

5.35.2.1 Execute()

```
bool RaceDay.Domain.Interfaces.IDeleteRaceLapCommand.Execute (
    int raceLapId )
```

Deletes the lap for racer.

Parameters

<i>raceLapId</i>	Id of the lap to delete
------------------	-------------------------

Returns

True if the lap was deleted, false if not

Implemented in [RaceDay.SqlLite.Commands.DeleteRaceLapCommand](#).

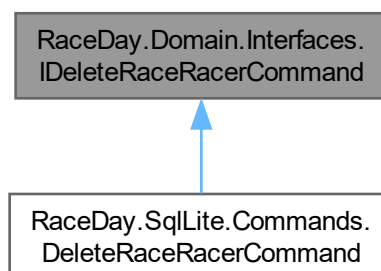

The documentation for this interface was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.Domain/Interfaces/IDeleteRaceLapCommand.cs

5.36 RaceDay.Domain.Interfaces.IDeleteRaceRacerCommand Interface Reference

A command for deleting a Racer from the Race.

Inheritance diagram for RaceDay.Domain.Interfaces.IDeleteRaceRacerCommand:

Public Member Functions

- bool [Execute](#) (int raceId, int racerId)
Deletes racer from race.

5.36.1 Detailed Description

A command for deleting a Racer from the Race.

5.36.2 Member Function Documentation

5.36.2.1 Execute()

```
bool RaceDay.Domain.Interfaces.IDeleteRaceRacerCommand.Execute (
    int  raceId,
    int  racerId )
```

Deletes racer from race.

Parameters

<i>raceId</i>	The Race Id to remove the racer from
<i>racerId</i>	The Racer Id to be removed

Returns

True if the racer was deleted, false if not

Exceptions

<i>Exception</i>	Throws if laps remain for racer
------------------	---------------------------------

Implemented in [RaceDay.SqlLite.Commands.DeleteRaceRacerCommand](#).

The documentation for this interface was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.Domain/Interfaces/IDeleteRaceRacerCommand.cs

5.37 RaceDay.Domain.Interfaces.IExchangeDataCommand< T > Interface Template Reference

A command for creating or updating an entity.

Public Member Functions

- T? [Execute](#) (T entity)
Creates or Updates an entity and returns the new record.

5.37.1 Detailed Description

A command for creating or updating an entity.

Template Parameters

<i>T</i>	The type of entity to create or update
----------	--

5.37.2 Member Function Documentation

5.37.2.1 Execute()

```
T? RaceDay.Domain.Interfaces.IExchangeDataCommand< T >.Execute (
    T entity )
```

Creates or Updates an entity and returns the new record.

Parameters

<i>entity</i>	Record to create or update
---------------	----------------------------

Returns

The created or updated entity

The documentation for this interface was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.Domain/Interfaces/IExchangeDataCommand.cs

5.38 RaceDay.WpfUi.Interfaces.INavigableViewModel Interface Reference

Interface for view models that need to be notified when navigated to.

Inheritance diagram for RaceDay.WpfUi.Interfaces.INavigableViewModel:

Public Member Functions

- void [OnNavigatedTo](#) ()
Called when the view model is navigated to.

5.38.1 Detailed Description

Interface for view models that need to be notified when navigated to.

5.38.2 Member Function Documentation

5.38.2.1 OnNavigatedTo()

```
void RaceDay.WpfUi.Interfaces.INavigableViewModel.OnNavigatedTo ( )
```

Called when the view model is navigated to.

Implemented in [RaceDay.WpfUi.ViewModels.AddRacerViewModel](#), and [RaceDay.WpfUi.ViewModels.HomeViewModel](#).

Here is the caller graph for this function:

The documentation for this interface was generated from the following file:

- `D:/Personal/College.RaceDay/src/RaceDay.WpfUi/Interfaces/INavigableViewModel.cs`

5.39 RaceDay.WpfUi.Extensions.Int32Extension Class Reference

Markup extension to allow for int32 values in xaml.

Inheritance diagram for RaceDay.WpfUi.Extensions.Int32Extension:

Collaboration diagram for RaceDay.WpfUi.Extensions.Int32Extension:

Public Member Functions

- [Int32Extension](#) (int value)
Initializes a new instance of the Int32Extension class.
- override object [ProvideValue](#) (IServiceProvider sp)
Returns an object that is provided as the value of the target property for this markup extension.

Properties

- int **Value** [get, set]
Gets or sets the value.

5.39.1 Detailed Description

Markup extension to allow for int32 values in xaml.

5.39.2 Constructor & Destructor Documentation

5.39.2.1 Int32Extension()

```
RaceDay.WpfUi.Extensions.Int32Extension.Int32Extension (
    int value )
```

Initializes a new instance of the Int32Extension class.

Parameters

<i>value</i>	The value.
--------------	------------

5.39.3 Member Function Documentation

5.39.3.1 ProvideValue()

```
override object RaceDay.WpfUi.Extensions.Int32Extension.ProvideValue (
    IServiceProvider sp )
```

Returns an object that is provided as the value of the target property for this markup extension.

Parameters

<i>sp</i>	Object that can provide services for the markup extension.
-----------	--

The documentation for this class was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/Extensions/Int32Extension.cs

5.40 RaceDay.WpfUi.Converters.InverseBooleanConverter Class Reference

Converts a boolean to its inverse.

Inheritance diagram for RaceDay.WpfUi.Converters.InverseBooleanConverter:

Collaboration diagram for RaceDay.WpfUi.Converters.InverseBooleanConverter:

Public Member Functions

- object **Convert** (object value, Type targetType, object parameter, CultureInfo culture)
- object **ConvertBack** (object value, Type targetType, object parameter, CultureInfo culture)

5.40.1 Detailed Description

Converts a boolean to its inverse.

The documentation for this class was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/Converters/InverseBooleanConverter.cs

5.41 RaceDay.WpfUi.Converters.InverseEqualityToVisibilityConverter Class Reference

Converts a value to a visibility If the value equals the parameter, then collapsed, otherwise visible.

Inheritance diagram for RaceDay.WpfUi.Converters.InverseEqualityToVisibilityConverter:

Collaboration diagram for RaceDay.WpfUi.Converters.InverseEqualityToVisibilityConverter:

Public Member Functions

- object **Convert** (object? value, Type targetType, object parameter, CultureInfo culture)
- object **ConvertBack** (object value, Type targetType, object parameter, CultureInfo culture)

5.41.1 Detailed Description

Converts a value to a visibility If the value equals the parameter, then collapsed, otherwise visible.

The documentation for this class was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/Converters/InverseEqualityToVisibilityConverter.cs

5.42 RaceDay.Domain.Interfaces.IRacerLapQuery Interface Reference

A query to retrieve Laps for a Racer.

Inheritance diagram for RaceDay.Domain.Interfaces.IRacerLapQuery:

Public Member Functions

- `IEnumerable< RaceLapDto > GetLapsForRacerInRace (int raceId, int racerId)`
Gets all Laps for Racer in Race.

5.42.1 Detailed Description

A query to retrieve Laps for a Racer.

5.42.2 Member Function Documentation

5.42.2.1 GetLapsForRacerInRace()

```

IEnumerable< RaceLapDto > RaceDay.Domain.Interfaces.IRacerLapQuery.GetLapsForRacerInRace (
    int raceId,
    int racerId )
  
```

Gets all Laps for Racer in Race.

Parameters

<i>raceId</i>	The Race Id
<i>racerId</i>	The Racer Id

Implemented in [RaceDay.Sqlite.Queries.RacerLapQuery](#).

The documentation for this interface was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.Domain/Interfaces/IRacerLapQuery.cs

5.43 RaceDay.Domain.Interfaces.IRacersQuery Interface Reference

A query for getting Racers.

Inheritance diagram for RaceDay.Domain.Interfaces.IRacersQuery:

Public Member Functions

- `IEnumerable< RacerDto > GetAll ()`
Gets all Racers.
- `IEnumerable< RacerDto > GetRacersForRace (int raceId)`
Gets all Racers for Race.

5.43.1 Detailed Description

A query for getting Racers.

5.43.2 Member Function Documentation

5.43.2.1 GetAll()

```
IEnumerable< RacerDto > RaceDay.Domain.Interfaces.IRacersQuery.GetAll ( )
```

Gets all Racers.

Implemented in [RaceDay.Sqlite.Queries.RacersQuery](#).

5.43.2.2 GetRacersForRace()

```
IEnumerable< RacerDto > RaceDay.Domain.Interfaces.IRacersQuery.GetRacersForRace (
    int raceId )
```

Gets all Racers for Race.

Parameters

<i>raceId</i>	The Race Id
---------------	-------------

Implemented in [RaceDay.SqlLite.Queries.RacersQuery](#).

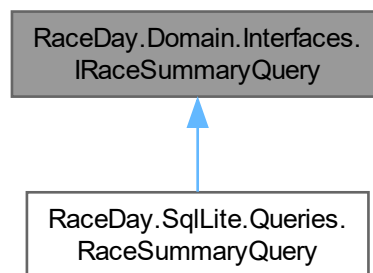

The documentation for this interface was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.Domain/Interfaces/IRacersQuery.cs

5.44 RaceDay.Domain.Interfaces.IRaceSummaryQuery Interface Reference

A query for Race summary.

Inheritance diagram for RaceDay.Domain.Interfaces.IRaceSummaryQuery:

Public Member Functions

- `IEnumerable< RaceSummaryDto > GetAll (int raceDayId)`
Gets all Races for Race Day summaries.
- `RaceSummaryDto? GetById (int id)`
Gets summary for a specific Race.

5.44.1 Detailed Description

A query for Race summary.

5.44.2 Member Function Documentation

5.44.2.1 GetAll()

```

IEnumerable< RaceSummaryDto > RaceDay.Domain.Interfaces.IRaceSummaryQuery.GetAll (
    int raceDayId )
  
```

Gets all Races for Race Day summaries.

Parameters

<i>race↔ DayId</i>	The Race Day id
------------------------	-----------------

Implemented in [RaceDay.SqlLite.Queries.RaceSummaryQuery](#).

5.44.2.2 GetById()

```
RaceSummaryDto? RaceDay.Domain.Interfaces.IRaceSummaryQuery.GetById (
    int id )
```

Gets summary for a specific Race.

Parameters

<i>id</i>	The Race Id
-----------	-------------

Implemented in [RaceDay.SqlLite.Queries.RaceSummaryQuery](#).

The documentation for this interface was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.Domain/Interfaces/IRaceSummaryQuery.cs

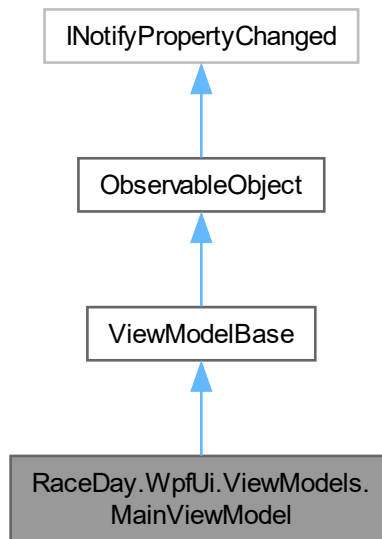

5.45 RaceDay.WpfUi.ViewModels.MainViewModel Class Reference

A view model providing data and logic for the Main view.

Inheritance diagram for RaceDay.WpfUi.ViewModels.MainViewModel:

Collaboration diagram for RaceDay.WpfUi.ViewModels.MainViewModel:

Public Member Functions

- [MainViewModel](#) ([NavigationService](#) navigationService, [DialogService](#) dialogService)
Creates a new instance of the MainViewModel class.

Properties

- [NavigationService](#) **NavigationService** [get]
The navigation service, responsible for navigating between views.
- [DialogService](#) **DialogService** [get]
The dialog service, responsible for displaying dialogs.

Additional Inherited Members

Protected Member Functions inherited from [RaceDay.WpfUi.Infrastructure.ObservableObject](#)

- virtual void [OnPropertyChanged](#) ([CallerMemberName] string? propertyName=null)
Raises the PropertyChanged event.
- virtual bool [SetField](#)< T > (ref T field, T value, [CallerMemberName] string? propertyName=null)
Sets the field and raises the PropertyChanged event if the value has changed.

Events inherited from [RaceDay.WpfUi.Infrastructure.ObservableObject](#)

- PropertyChangedEventHandler? **PropertyChanged**

5.45.1 Detailed Description

A view model providing data and logic for the Main view.

5.45.2 Constructor & Destructor Documentation

5.45.2.1 MainViewModel()

```
RaceDay.WpfUi.ViewModels.MainViewModel.MainViewModel (
    NavigationService navigationService,
    DialogService dialogService )
```

Creates a new instance of the MainViewModel class.

Parameters

<i>navigationService</i>	The navigation service, responsible for navigating between views
<i>dialogService</i>	The dialog service, responsible for displaying dialogs

The documentation for this class was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/ViewModels/MainViewModel.cs

5.46 RaceDay.WpfUi.MainWindow Class Reference

Interaction logic for MainWindow.xaml.

Inheritance diagram for RaceDay.WpfUi.MainWindow:

Collaboration diagram for RaceDay.WpfUi.MainWindow:

Public Member Functions

- void **InitializeComponent** ()
InitializeComponent.
- void **InitializeComponent** ()
InitializeComponent.
- void **InitializeComponent** ()
InitializeComponent.

5.46.1 Detailed Description

Interaction logic for MainWindow.xaml.

MainWindow.

The documentation for this class was generated from the following files:

- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/MainWindow.xaml.cs
- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/obj/Debug/net6.0-windows/MainWindow.g.cs
- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/obj/Debug/net6.0-windows/MainWindow.g.i.cs
- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/obj/Release/net6.0-windows/MainWindow.g.cs

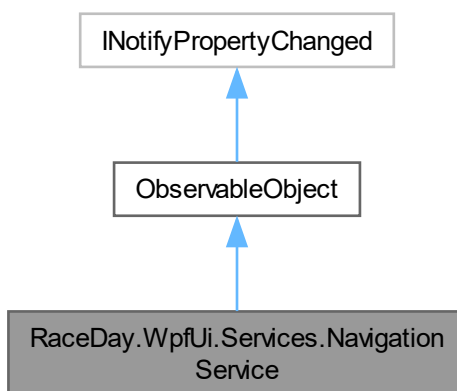

5.47 RaceDay.WpfUi.Services.NavigationService Class Reference

Service for navigating between views in the application.

Inheritance diagram for RaceDay.WpfUi.Services.NavigationService:

Collaboration diagram for RaceDay.WpfUi.Services.NavigationService:

Public Member Functions

- [NavigationService](#) (IServiceProvider serviceProvider)
Creates a new instance of the NavigationService class.
- void [NavigateTo](#)< T > ()
Navigates to the specified view model.
- void [NavigateTo](#) (ViewModelBase viewModel)
Navigates to the specified view model.

Properties

- [ViewModelBase?](#) **ActiveViewModel** [get]
A view model currently displayed in the application.

Additional Inherited Members

Protected Member Functions inherited from [RaceDay.WpfUi.Infrastructure.ObservableObject](#)

- virtual void [OnPropertyChanged](#) ([CallerMemberName] string? propertyName=null)
Raises the PropertyChanged event.
- virtual bool [SetField< T >](#) (ref T field, T value, [CallerMemberName] string? propertyName=null)
Sets the field and raises the PropertyChanged event if the value has changed.

Events inherited from [RaceDay.WpfUi.Infrastructure.ObservableObject](#)

- PropertyChangedEventHandler? **PropertyChanged**

5.47.1 Detailed Description

Service for navigating between views in the application.

5.47.2 Constructor & Destructor Documentation

5.47.2.1 NavigationService()

```
RaceDay.WpfUi.Services.NavigationService.NavigationService (
    IServiceProvider serviceProvider )
```

Creates a new instance of the NavigationService class.

Parameters

<i>serviceProvider</i>	The service provider
------------------------	----------------------

5.47.3 Member Function Documentation

5.47.3.1 NavigateTo()

```
void RaceDay.WpfUi.Services.NavigationService.NavigateTo (
    ViewModelBase viewModel )
```

Navigates to the specified view model.

Parameters

<i>viewModel</i>	The view model.
------------------	-----------------

Here is the caller graph for this function:

5.47.3.2 NavigateTo< T >()

```
void RaceDay.WpfUi.Services.NavigationService.NavigateTo< T > ( )
```

Navigates to the specified view model.

Template Parameters

<i>T</i>	The type of the view model.
----------	-----------------------------

Type Constraints

T* : *ViewModelBase

T* : *INavigableViewModel

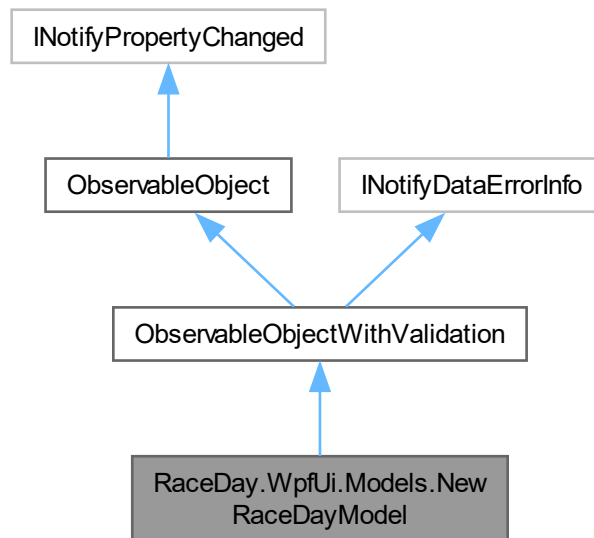

The documentation for this class was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/Services/NavigationService.cs

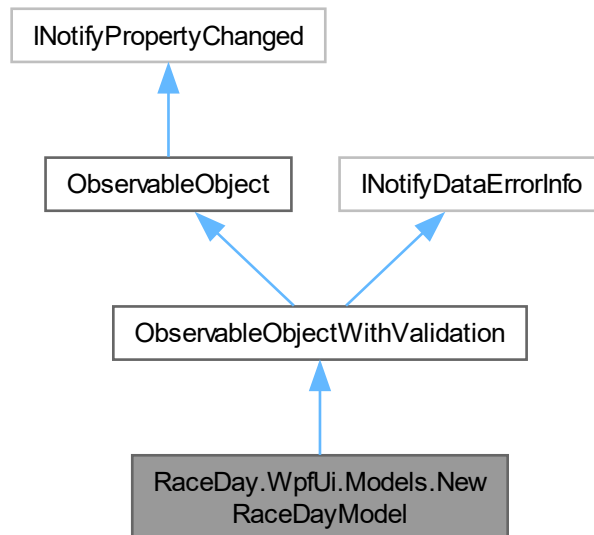

5.48 RaceDay.WpfUi.Models.NewRaceDayModel Class Reference

A model for creating new Race Days.

Inheritance diagram for RaceDay.WpfUi.Models.NewRaceDayModel:

Collaboration diagram for RaceDay.WpfUi.Models.NewRaceDayModel:

Properties

- string? **Name** [get, set]

The name of the race day.

- float? **SignUpFee** [get, set]

The sign up fee.

- float? **LapDistance** [get, set]

The Lap distance in kilometers.

- float? **PetrolCostPerLap** [get, set]

The estimated petrol cost per lap.

- bool **HasAllRequiredData** [get]

Indicates whether the model has all the required data.

Properties inherited from [RaceDay.WpfUi.Infrastructure.ObservableObjectWithValidation](#)

- bool **HasErrors** [get]
- bool **ForceInitialErrorState** [get, set]

This property is used to force the initial error state of the object, before any property has been set. This is useful for when you want to show the error state of the object before the user has interacted with it. For example, when a dialog is opened, you may want to force the error state to set the CanExecute state of a command.

Additional Inherited Members

Public Member Functions inherited from [RaceDay.WpfUi.Infrastructure.ObservableObjectWithValidation](#)

- IEnumerable **GetErrors** (string? propertyName)

Protected Member Functions inherited from [RaceDay.WpfUi.Infrastructure.ObservableObjectWithValidation](#)

- override bool **SetField**< T > (ref T field, T value, [CallerMemberName] string? propertyName=null)
Sets the field and raises the PropertyChanged event if the value has changed.

Parameters

field	<i>A reference to the field to set.</i>
value	<i>The value to set the field to.</i>
propertyName	<i>Name of the property.</i>

Template Parameters

T	<i>The type of the field.</i>
---	-------------------------------

Returns

True if the value has changed, false otherwise.

Protected Member Functions inherited from [RaceDay.WpfUi.Infrastructure.ObservableObject](#)

- virtual void **OnPropertyChanged** ([CallerMemberName] string? propertyName=null)

Raises the PropertyChanged event.

- virtual bool **SetField**< T > (ref T field, T value, [CallerMemberName] string? propertyName=null)

Sets the field and raises the PropertyChanged event if the value has changed.

Events inherited from [RaceDay.WpfUi.Infrastructure.ObservableObjectWithValidation](#)

- EventHandler< DataErrorsChangedEventArgs >? **ErrorsChanged**

Events inherited from [RaceDay.WpfUi.Infrastructure.ObservableObject](#)

- PropertyChangedEventHandler? **PropertyChanged**

5.48.1 Detailed Description

A model for creating new Race Days.

The documentation for this class was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/Models/NewRaceDayModel.cs

5.49 RaceDay.WpfUi.Views.NewRaceDayView Class Reference

NewRaceDayView.

Inheritance diagram for RaceDay.WpfUi.Views.NewRaceDayView:

Collaboration diagram for RaceDay.WpfUi.Views.NewRaceDayView:

Public Member Functions

- void **InitializeComponent** ()
InitializeComponent.
- void **InitializeComponent** ()
InitializeComponent.
- void **InitializeComponent** ()
InitializeComponent.

5.49.1 Detailed Description

NewRaceDayView.

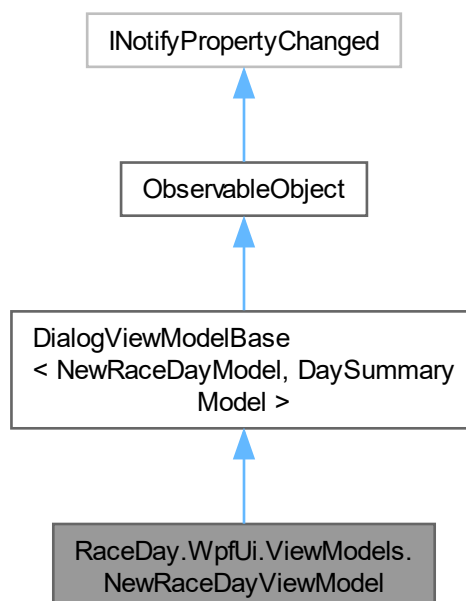

The documentation for this class was generated from the following files:

- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/obj/Debug/net6.0-windows/Views/NewRaceDayView.g.cs
- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/obj/Debug/net6.0-windows/Views/NewRaceDayView.g.i.cs
- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/obj/Release/net6.0-windows/Views/NewRaceDayView.g.cs
- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/Views/NewRaceDayView.xaml.cs

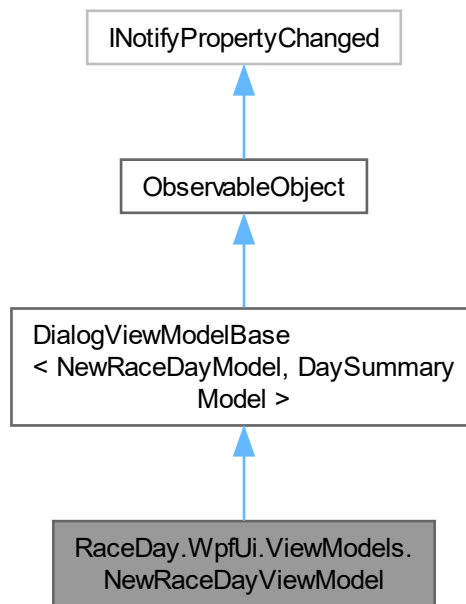

5.50 RaceDay.WpfUi.ViewModels.NewRaceDayViewModel Class Reference

A view model providing data and logic for view for creating new Race Days.

Inheritance diagram for RaceDay.WpfUi.ViewModels.NewRaceDayViewModel:

Collaboration diagram for RaceDay.WpfUi.ViewModels.NewRaceDayViewModel:

Public Member Functions

- [NewRaceDayViewModel](#) ([ICreateRaceDayCommand](#) createRaceDayCommand, [IDaySummaryQuery](#) daySummaryQuery)
Creates a new instance of the NewRaceDayViewModel class.

Public Member Functions inherited from [RaceDay.WpfUi.Infrastructure.DialogViewModelBase](#) < [NewRaceDayModel](#), [DaySummaryModel](#) >

- void **OpenDialog** ()
Opens the dialog.
- void **CloseDialog** (object? o=null)
Closes the dialog.

Properties

- [NewRaceDayModel](#) **NewRaceDay** [get]
A model representing a new Race Day.
- ICommand **CancelCommand** [get]
A command for cancelling the operation.
- ICommand **SaveCommand** [get]
A command for saving data to the persistence storage.

Properties inherited from**RaceDay.WpfUi.Infrastructure.DialogViewModelBase< NewRaceDayModel, DaySummaryModel >**

- string **ErrorMessage** [get, protected set]
The error message to display in the dialog.
- bool **DisplayError** [get]
Whether or not to display the error message in the dialog.
- bool **DialogHostIsOpen** [get]
Indicates whether or not the dialog is open. This is used to bind to the DialogHost.IsOpen property. Dialog closes when this is set to false.
- virtual ? DialogClosingEventHandler **DialogClosingHandler** [get, set]
The dialog closing handler. This is used to bind to the DialogHost.DialogClosing attached property. This can be used to prevent the dialog from closing or implement custom logic when the dialog closes.
- TModel **Model** [get, set]
The result that is returned when the dialog closes. If no value is set, the dialog is assumed to have been cancelled.
- TResult? **Result** [get, set]
The result that is returned when the dialog closes. If no value is set, the dialog is assumed to have been cancelled.

Additional Inherited Members**Static Public Member Functions inherited from****RaceDay.WpfUi.Infrastructure.DialogViewModelBase< NewRaceDayModel, DaySummaryModel >**

- static bool **CanCloseDialog** (object? o)

Protected Member Functions inherited from**RaceDay.WpfUi.Infrastructure.ObservableObject**

- virtual void **OnPropertyChanged** ([CallerMemberName] string? propertyName=null)
Raises the PropertyChanged event.
- virtual bool **SetField< T >** (ref T field, T value, [CallerMemberName] string? propertyName=null)
Sets the field and raises the PropertyChanged event if the value has changed.

Events inherited from RaceDay.WpfUi.Infrastructure.ObservableObject

- PropertyChangedEventHandler? **PropertyChanged**

5.50.1 Detailed Description

A view model providing data and logic for view for creating new Race Days.

5.50.2 Constructor & Destructor Documentation**5.50.2.1 NewRaceDayViewModel()**

```
RaceDay.WpfUi.ViewModels.NewRaceDayViewModel.NewRaceDayViewModel (
    ICreateRaceDayCommand createRaceDayCommand,
    IDaySummaryQuery daySummaryQuery )
```

Creates a new instance of the NewRaceDayViewModel class.

Parameters

<i>createRaceDayCommand</i>	A command for creating new Race Day in the persistence storage
<i>daySummaryQuery</i>	A query for retrieving Race Day summaries from the persistence storage

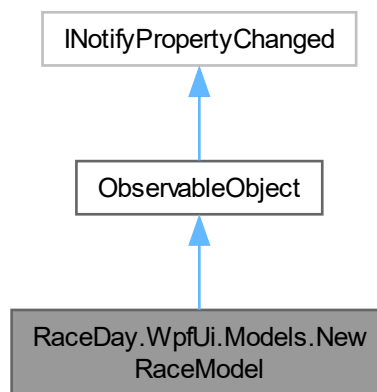

The documentation for this class was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/ViewModels/NewRaceDayViewModel.cs

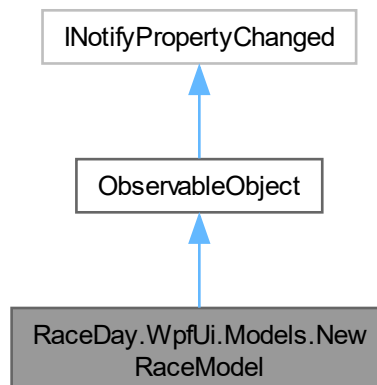

5.51 RaceDay.WpfUi.Models.NewRaceModel Class Reference

Model for creating new Races.

Inheritance diagram for RaceDay.WpfUi.Models.NewRaceModel:

Collaboration diagram for RaceDay.WpfUi.Models.NewRaceModel:

Properties

- int **RaceDayId** [get]
The Id of the Race Day for which new Race is being created.
- string? **RaceDayName** [get]
The name of the Race Day.
- DateTime **RaceDate** [get, set]
The date of the Race.

Additional Inherited Members

Protected Member Functions inherited from [RaceDay.WpfUi.Infrastructure.ObservableObject](#)

- virtual void **OnPropertyChanged** ([CallerMemberName] string? propertyName=null)
Raises the PropertyChanged event.
- virtual bool **SetField**< T > (ref T field, T value, [CallerMemberName] string? propertyName=null)
Sets the field and raises the PropertyChanged event if the value has changed.

Events inherited from [RaceDay.WpfUi.Infrastructure.ObservableObject](#)

- PropertyChangedEventHandler? **PropertyChanged**

5.51.1 Detailed Description

Model for creating new Races.

The documentation for this class was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/Models/NewRaceModel.cs

5.52 RaceDay.WpfUi.Views.NewRaceView Class Reference

NewRaceView.

Inheritance diagram for RaceDay.WpfUi.Views.NewRaceView:

Collaboration diagram for RaceDay.WpfUi.Views.NewRaceView:

Public Member Functions

- void **InitializeComponent** ()
InitializeComponent.
- void **InitializeComponent** ()
InitializeComponent.
- void **InitializeComponent** ()
InitializeComponent.

5.52.1 Detailed Description

NewRaceView.

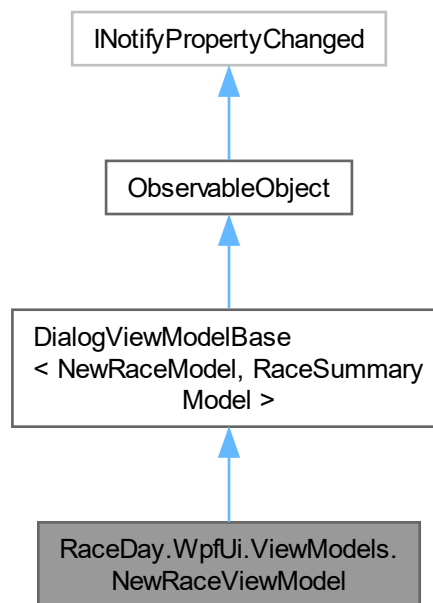

The documentation for this class was generated from the following files:

- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/obj/Debug/net6.0-windows/Views/NewRaceView.g.cs
- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/obj/Debug/net6.0-windows/Views/NewRaceView.g.i.cs
- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/obj/Release/net6.0-windows/Views/NewRaceView.g.cs
- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/Views/NewRaceView.xaml.cs

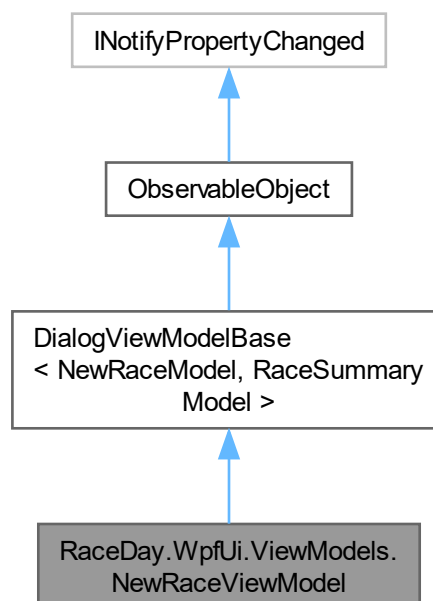

5.53 RaceDay.WpfUi.ViewModels.NewRaceViewModel Class Reference

A view model providing data and logic for a view for creating new Races.

Inheritance diagram for RaceDay.WpfUi.ViewModels.NewRaceViewModel:

Collaboration diagram for RaceDay.WpfUi.ViewModels.NewRaceViewModel:

Public Member Functions

- [NewRaceViewModel](#) ([ICreateRaceCommand](#) createRaceDayRaceCommand, [IRaceSummaryQuery](#) raceSummaryQuery)

Creates a new instance of the NewRaceViewModel class.

Public Member Functions inherited from

[RaceDay.WpfUi.Infrastructure.DialogViewModelBase](#)< [NewRaceModel](#), [RaceSummaryModel](#) >

- void **OpenDialog** ()
Opens the dialog.
- void **CloseDialog** (object? o=null)
Closes the dialog.

Properties

- string **ViewTitle** [get]
The title of the view.
- ICommand **ConfirmCommand** [get]
Command for confirming the operation.
- ICommand **CancelCommand** [get]
Command for cancelling the operation.

Properties inherited from

[RaceDay.WpfUi.Infrastructure.DialogViewModelBase](#)< [NewRaceModel](#), [RaceSummaryModel](#) >

- string **ErrorMessage** [get, protected set]
The error message to display in the dialog.
- bool **DisplayError** [get]
Whether or not to display the error message in the dialog.
- bool **DialogHostIsOpen** [get]
Indicates whether or not the dialog is open. This is used to bind to the DialogHost.IsOpen property. Dialog closes when this is set to false.
- virtual ? DialogClosingEventHandler **DialogClosingHandler** [get, set]
The dialog closing handler. This is used to bind to the DialogHost.DialogClosing attached property. This can be used to prevent the dialog from closing or implement custom logic when the dialog closes.
- TModel **Model** [get, set]
The result that is returned when the dialog closes. If no value is set, the dialog is assumed to have been cancelled.
- TResult? **Result** [get, set]
The result that is returned when the dialog closes. If no value is set, the dialog is assumed to have been cancelled.

Additional Inherited Members

Static Public Member Functions inherited from

[RaceDay.WpfUi.Infrastructure.DialogViewModelBase](#)< [NewRaceModel](#), [RaceSummaryModel](#) >

- static bool **CanCloseDialog** (object? o)

Protected Member Functions inherited from RaceDay.WpfUi.Infrastructure.ObservableObject

- virtual void [OnPropertyChanged](#) ([CallerMemberName] string? propertyName=null)
Raises the PropertyChanged event.
- virtual bool [SetField< T >](#) (ref T field, T value, [CallerMemberName] string? propertyName=null)
Sets the field and raises the PropertyChanged event if the value has changed.

Events inherited from RaceDay.WpfUi.Infrastructure.ObservableObject

- PropertyChangedEventHandler? **PropertyChanged**

5.53.1 Detailed Description

A view model providing data and logic for a view for creating new Races.

5.53.2 Constructor & Destructor Documentation

5.53.2.1 NewRaceViewModel()

```
RaceDay.WpfUi.ViewModels.NewRaceViewModel.NewRaceViewModel (
    ICreateRaceCommand createRaceDayRaceCommand,
    IRaceSummaryQuery raceSummaryQuery )
```

Creates a new instance of the NewRaceViewModel class.

Parameters

<i>createRaceDayRaceCommand</i>	Command for creating new Races in the persistence storage
<i>raceSummaryQuery</i>	Query for retrieving Race summaries from the persistence storage

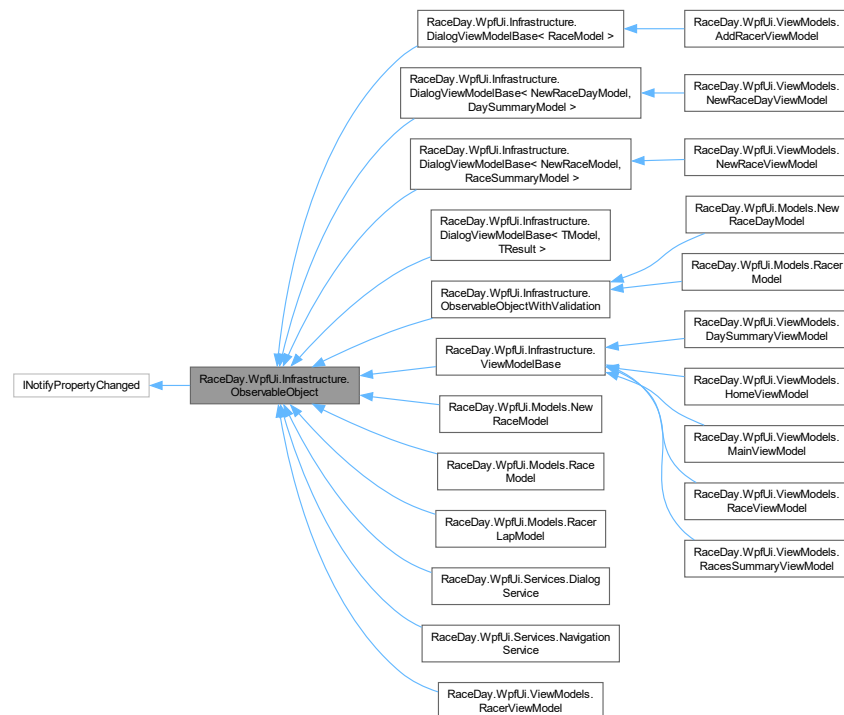

The documentation for this class was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/ViewModels/NewRaceViewModel.cs

5.54 RaceDay.WpfUi.Infrastructure.ObservableObject Class Reference

Base class for observable objects Implements INotifyPropertyChanged

Inheritance diagram for RaceDay.WpfUi.Infrastructure.ObservableObject:

Collaboration diagram for RaceDay.WpfUi.Infrastructure.ObservableObject:

Protected Member Functions

- virtual void **OnPropertyChanged** ([CallerMemberName] string? propertyName=null)
Raises the PropertyChanged event.
- virtual bool **SetField**< T > (ref T field, T value, [CallerMemberName] string? propertyName=null)
Sets the field and raises the PropertyChanged event if the value has changed.

Events

- PropertyChangedEventHandler? **PropertyChanged**

5.54.1 Detailed Description

Base class for observable objects Implements INotifyPropertyChanged

5.54.2 Member Function Documentation

5.54.2.1 OnPropertyChanged()

```
virtual void RaceDay.WpfUi.Infrastructure.ObservableObject.OnPropertyChanged (
    [CallerMemberName] string? propertyName = null ) [protected], [virtual]
```

Raises the PropertyChanged event.

Parameters

<i>propertyName</i>	Name of the property.
---------------------	-----------------------

Here is the caller graph for this function:

5.54.2.2 SetField< T >()

```
virtual bool RaceDay.WpfUi.Infrastructure.ObservableObject.SetField< T > (
    ref T field,
    T value,
    [CallerMemberName] string? propertyName = null ) [protected], [virtual]
```

Sets the field and raises the PropertyChanged event if the value has changed.

Parameters

<i>field</i>	A reference to the field to set.
<i>value</i>	The value to set the field to.
<i>propertyName</i>	Name of the property.

Template Parameters

<i>T</i>	The type of the field.
----------	------------------------

Returns

True if the value has changed, false otherwise.

Reimplemented in [RaceDay.WpfUi.Infrastructure.ObservableObjectWithValidation](#).

Here is the call graph for this function:

The documentation for this class was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/Infrastructure/ObservableObject.cs

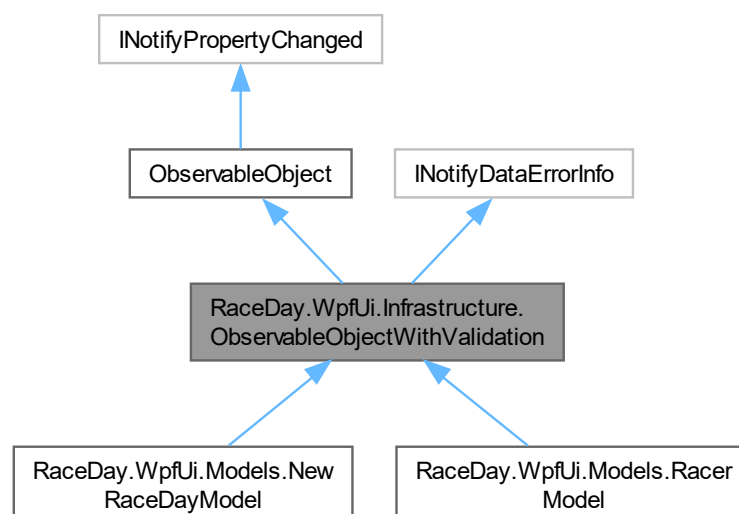

5.55 RaceDay.WpfUi.Infrastructure.ObservableObjectWithValidation Class Reference

Base class for observable objects with validation

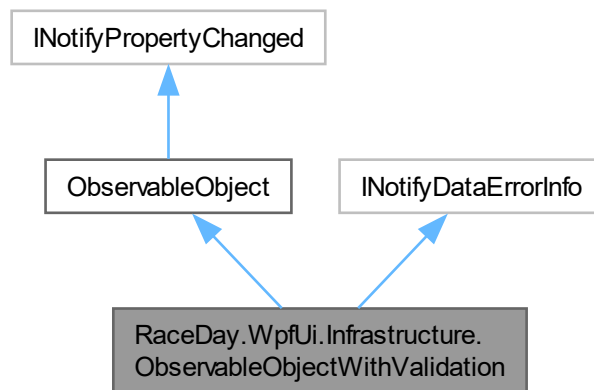

Implements `INotifyPropertyChanged`

Implements `INotifyDataErrorInfo`

Inheritance diagram for `RaceDay.WpfUi.Infrastructure.ObservableObjectWithValidation`:

Collaboration diagram for RaceDay.WpfUi.Infrastructure.ObservableObjectWithValidation:

Public Member Functions

- IEnumerable **GetErrors** (string? propertyName)

Protected Member Functions

- override bool **SetField**< T > (ref T field, T value, [CallerMemberName] string? propertyName=null)
Sets the field and raises the PropertyChanged event if the value has changed.

Parameters

field	<i>A reference to the field to set.</i>
value	<i>The value to set the field to.</i>
propertyName	<i>Name of the property.</i>

Template Parameters

T	<i>The type of the field.</i>
---	-------------------------------

Returns

True if the value has changed, false otherwise.

Protected Member Functions inherited from [RaceDay.WpfUi.Infrastructure.ObservableObject](#)

- virtual void **OnPropertyChanged** ([CallerMemberName] string? propertyName=null)
Raises the PropertyChanged event.
- virtual bool **SetField**< T > (ref T field, T value, [CallerMemberName] string? propertyName=null)
Sets the field and raises the PropertyChanged event if the value has changed.

Properties

- bool **HasErrors** [get]
- bool **ForceInitialErrorState** [get, set]

This property is used to force the initial error state of the object, before any property has been set. This is useful for when you want to show the error state of the object before the user has interacted with it. For example, when a dialog is opened, you may want to force the error state to set the CanExecute state of a command.

Events

- EventHandler< DataErrorsChangedEventArgs >? **ErrorsChanged**

Events inherited from [RaceDay.WpfUi.Infrastructure.ObservableObject](#)

- PropertyChangedEventHandler? **PropertyChanged**

5.55.1 Detailed Description

Base class for observable objects with validation

Implements INotifyPropertyChanged

Implements INotifyDataErrorInfo

5.55.2 Member Function Documentation

5.55.2.1 SetField< T >()

```
override bool RaceDay.WpfUi.Infrastructure.ObservableObjectWithValidation.SetField< T > (
    ref T field,
    T value,
    [CallerMemberName] string? propertyName = null ) [protected], [virtual]
```

Sets the field and raises the PropertyChanged event if the value has changed.

Parameters

<i>field</i>	A reference to the field to set.
<i>value</i>	The value to set the field to.
<i>propertyName</i>	Name of the property.

Template Parameters

<i>T</i>	The type of the field.
----------	------------------------

Returns

True if the value has changed, false otherwise.

Reimplemented from [RaceDay.WpfUi.Infrastructure.ObservableObject](#).

The documentation for this class was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/Infrastructure/ObservableObjectWithValidation.cs

5.56 RaceDay.WpfUi.Views.RaceDayRacesView Class Reference

RaceDayRacesView.

Inheritance diagram for RaceDay.WpfUi.Views.RaceDayRacesView:

Collaboration diagram for RaceDay.WpfUi.Views.RaceDayRacesView:

Public Member Functions

InitializeComponent.

5.57.1 Detailed Description

RaceDaySummaryView.

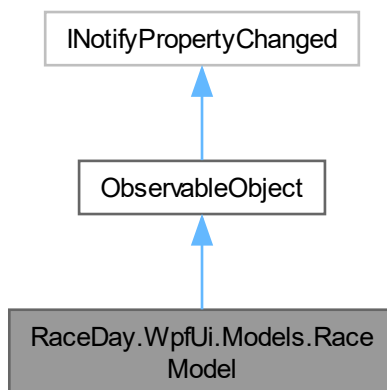

The documentation for this class was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/obj/Debug/net6.0-windows/Views/RaceDaySummaryView.g.i.cs

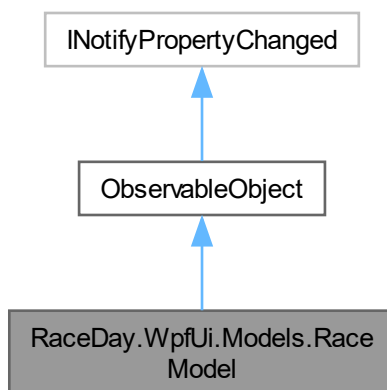

5.58 RaceDay.WpfUi.Models.RaceModel Class Reference

A model of the Race.

Inheritance diagram for RaceDay.WpfUi.Models.RaceModel:

Collaboration diagram for RaceDay.WpfUi.Models.RaceModel:

Properties

- int **RaceId** [get]
The unique identifier of the Race.
- int **RaceDayId** [get]

- The unique identifier of the Race Day.*

 - string? **RaceDayName** [get]
- The name of the Race Day.*

 - float **SignUpFee** [get]
- The Race Day sign up fee.*

 - float **LapDistanceMiles** [get]
- The Lap distance in kilometers.*

 - TimeSpan **AllTimeLapRecord** [get]
- The All Time Lap Record.*

 - TimeSpan **RaceLapRecord** [get, set]
- The record Lap Time of the Race.*

 - bool **IsRecordBeaten** [get, set]
- Indicates whether the AllTimeLapRecord has been beaten.*

 - float **PetrolCostPerLap** [get]
- The estimated petrol cost per lap.*

 - float **RaceProfit** [get, set]
- The total profit made from the race.*

Additional Inherited Members

Protected Member Functions inherited from [RaceDay.WpfUi.Infrastructure.ObservableObject](#)

- virtual void [OnPropertyChanged](#) ([CallerMemberName] string? propertyName=null)
Raises the PropertyChanged event.
- virtual bool [SetField< T >](#) (ref T field, T value, [CallerMemberName] string? propertyName=null)
Sets the field and raises the PropertyChanged event if the value has changed.

Events inherited from [RaceDay.WpfUi.Infrastructure.ObservableObject](#)

- PropertyChangedEventHandler? **PropertyChanged**

5.58.1 Detailed Description

A model of the Race.

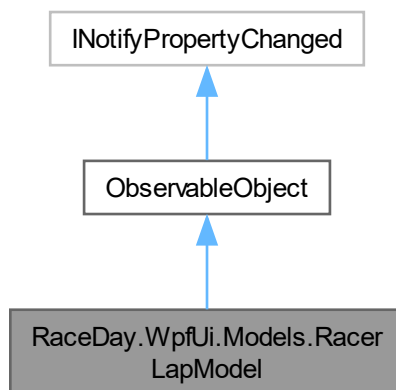

The documentation for this class was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/Models/RaceModel.cs

5.59 RaceDay.WpfUi.Models.RacerLapModel Class Reference

A model of the Racer Lap.

Inheritance diagram for RaceDay.WpfUi.Models.RacerLapModel:

Collaboration diagram for RaceDay.WpfUi.Models.RacerLapModel:

Properties

- **int LapId** [get]
The unique identifier of the Racer Lap.
- **int RaceDayId** [get]

- *The unique identifier of the Race Day.*
• int **RaceId** [get]
- *The unique identifier of the Race.*
• int **RacerId** [get]
- *The unique identifier of the Racer.*
• TimeSpan **LapTime** [get, set]
- *The Lap time.*
• float **LapDistanceMiles** [get]
- *The Lap distance in miles.*
• float **LapSpeedMph** [get]
- *The Lap speed in miles per hour.*

Additional Inherited Members

Protected Member Functions inherited from [RaceDay.WpfUi.Infrastructure.ObservableObject](#)

- virtual void [OnPropertyChanged](#) ([CallerMemberName] string? propertyName=null)
Raises the PropertyChanged event.
- virtual bool [SetField< T >](#) (ref T field, T value, [CallerMemberName] string? propertyName=null)
Sets the field and raises the PropertyChanged event if the value has changed.

Events inherited from [RaceDay.WpfUi.Infrastructure.ObservableObject](#)

- PropertyChangedEventHandler? **PropertyChanged**

5.59.1 Detailed Description

A model of the Racer Lap.

The documentation for this class was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/Models/RacerLapModel.cs

5.60 RaceDay.SQLite.Queries.RacerLapQuery Class Reference

Inheritance diagram for RaceDay.SQLite.Queries.RacerLapQuery:

Collaboration diagram for RaceDay.SqlLite.Queries.RacerLapQuery:

Public Member Functions

- **RacerLapQuery** (string dbPath)
- IEnumerable< RaceLapDto > [GetLapsForRacerInRace](#) (int raceId, int racerId)
Gets all Laps for Racer in Race.
- IEnumerable< RaceLapDto > [GetLapsForRacerInRace](#) (int raceId, int racerId)
Gets all Laps for Racer in Race.

Additional Inherited Members

Protected Member Functions inherited from [RaceDay.SqlLite.Infrastructure.CommandQueryBase](#)

- [CommandQueryBase](#) (string dbPath)
Creates a new instance of the CommandQueryBase class.
- SQLiteConnection **CreateConnection** ()
Creates a new SQLiteConnection instance.

Properties inherited from [RaceDay.SqlLite.Infrastructure.CommandQueryBase](#)

- SQLiteConnectionString **ConnectionString** [get]
The connection string to the database.

5.60.1 Detailed Description

5.60.2 Member Function Documentation

5.60.2.1 GetLapsForRacerInRace()

```

IEnumerable< RaceLapDto > RaceDay.SqlLite.Queries.RacerLapQuery.GetLapsForRacerInRace (
    int raceId,
    int racerId )
  
```

Gets all Laps for Racer in Race.

Parameters

<i>raceId</i>	The Race Id
<i>racerId</i>	The Racer Id

Implements [RaceDay.Domain.Interfaces.IRacerLapQuery](#).

Here is the call graph for this function:

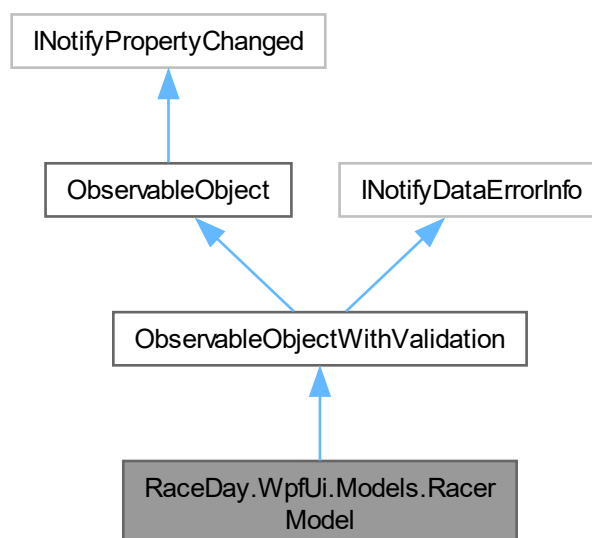

The documentation for this class was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.Sqlite/Queries/RacerLapQuery.cs

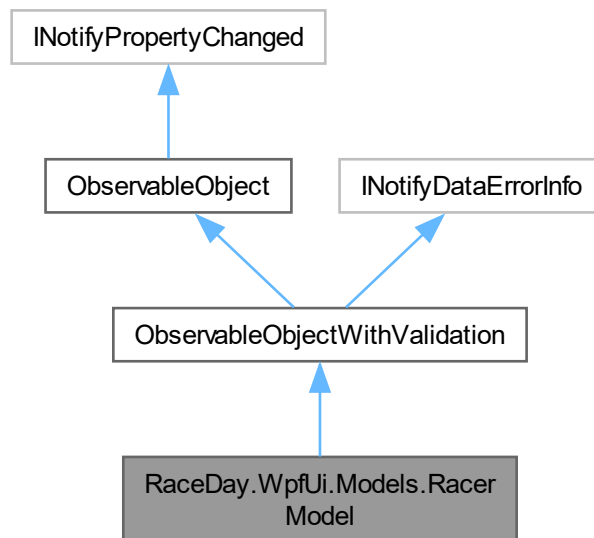

5.61 RaceDay.WpfUi.Models.RacerModel Class Reference

Model for Racer.

Inheritance diagram for `RaceDay.WpfUi.Models.RacerModel`:

Collaboration diagram for RaceDay.WpfUi.Models.RacerModel:

Properties

- bool **IsSelected** [get, set]
Indicates if the Racer is selected in the UI.
- int **RacerId** [get]
The unique identifier of the Racer.
- string? **RacerName** [get, set]
The name of the Racer.
- byte? **Age** [get, set]
The age of the Racer.
- bool **HasAllRequiredData** [get]
Indicates if the Racer is valid.

Properties inherited from [RaceDay.WpfUi.Infrastructure.ObservableObjectWithValidation](#)

- bool **HasErrors** [get]
- bool **ForceInitialErrorState** [get, set]
This property is used to force the initial error state of the object, before any property has been set. This is useful for when you want to show the error state of the object before the user has interacted with it. For example, when a dialog is opened, you may want to force the error state to set the `CanExecute` state of a command.

Additional Inherited Members

Public Member Functions inherited from [RaceDay.WpfUi.Infrastructure.ObservableObjectWithValidation](#)

- IEnumerable **GetErrors** (string? propertyName)

Protected Member Functions inherited from [RaceDay.WpfUi.Infrastructure.ObservableObjectWithValidation](#)

- override bool [SetField< T >](#) (ref T field, T value, [CallerMemberName] string? propertyName=null)
Sets the field and raises the PropertyChanged event if the value has changed.

Parameters

field	A reference to the field to set.
value	The value to set the field to.
propertyName	Name of the property.

Template Parameters

T	The type of the field.
---	------------------------

Returns

True if the value has changed, false otherwise.

Protected Member Functions inherited from [RaceDay.WpfUi.Infrastructure.ObservableObject](#)

- virtual void [OnPropertyChanged](#) ([CallerMemberName] string? propertyName=null)
Raises the PropertyChanged event.
- virtual bool [SetField< T >](#) (ref T field, T value, [CallerMemberName] string? propertyName=null)
Sets the field and raises the PropertyChanged event if the value has changed.

Events inherited from [RaceDay.WpfUi.Infrastructure.ObservableObjectWithValidation](#)

- EventHandler< DataErrorsChangedEventArgs >? **ErrorsChanged**

Events inherited from [RaceDay.WpfUi.Infrastructure.ObservableObject](#)

- PropertyChangedEventHandler? **PropertyChanged**

5.61.1 Detailed Description

Model for Racer.

The documentation for this class was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/Models/RacerModel.cs

5.62 RaceDay.SQLite.Queries.RacersQuery Class Reference

Inheritance diagram for RaceDay.SQLite.Queries.RacersQuery:

Collaboration diagram for RaceDay.SQLite.Queries.RacersQuery:

Public Member Functions

- **RacersQuery** (string dbPath)
- IEnumerable< RacerDto > [GetAll](#) ()
Gets all Racers.
- IEnumerable< RacerDto > [GetRacersForRace](#) (int raceId)
Gets all Racers for Race.

Parameters

raceId	The Race Id
--------	-------------

- IEnumerable< RacerDto > [GetAll](#) ()
Gets all Racers.

- `IEnumerable< RacerDto > GetRacersForRace (int raceId)`
Gets all Racers for Race.

Additional Inherited Members

Protected Member Functions inherited from [RaceDay.SQLite.Infrastructure.CommandQueryBase](#)

- [CommandQueryBase](#) (string dbPath)
Creates a new instance of the CommandQueryBase class.
- `SQLiteConnection CreateConnection ()`
Creates a new SQLiteConnection instance.

Properties inherited from [RaceDay.SQLite.Infrastructure.CommandQueryBase](#)

- `SQLiteConnectionString ConnectionString [get]`
The connection string to the database.

5.62.1 Detailed Description

5.62.2 Member Function Documentation

5.62.2.1 GetAll()

```
IEnumerable< RacerDto > RaceDay.SQLite.Queries.RacersQuery.GetAll ( )
```

Gets all Racers.

Implements [RaceDay.Domain.Interfaces.IRacersQuery](#).

Here is the call graph for this function:

5.62.2.2 GetRacersForRace()

```
IEnumerable< RacerDto > RaceDay.SQLite.Queries.RacersQuery.GetRacersForRace (
    int raceId )
```

Gets all Racers for Race.

Parameters

<i>raceId</i>	The Race Id
---------------	-------------

Implements [RaceDay.Domain.Interfaces.IRacersQuery](#).

Here is the call graph for this function:

The documentation for this class was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.Sqlite/Queries/RacersQuery.cs

5.63 RaceDay.WpfUi.Views.RacerView Class Reference

RacerView.

Inheritance diagram for RaceDay.WpfUi.Views.RacerView:

Collaboration diagram for RaceDay.WpfUi.Views.RacerView:

Public Member Functions

- void **InitializeComponent** ()
InitializeComponent.
- void **InitializeComponent** ()
InitializeComponent.
- void **InitializeComponent** ()
InitializeComponent.

5.63.1 Detailed Description

RacerView.

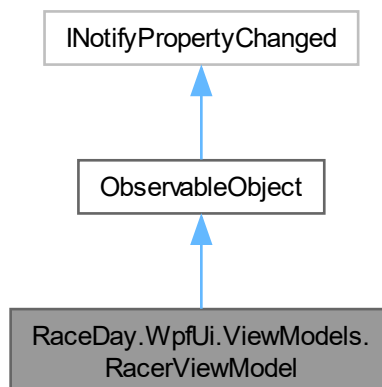

The documentation for this class was generated from the following files:

- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/obj/Debug/net6.0-windows/Views/RacerView.g.cs
- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/obj/Debug/net6.0-windows/Views/RacerView.g.i.cs
- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/obj/Release/net6.0-windows/Views/RacerView.g.cs
- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/Views/RacerView.xaml.cs

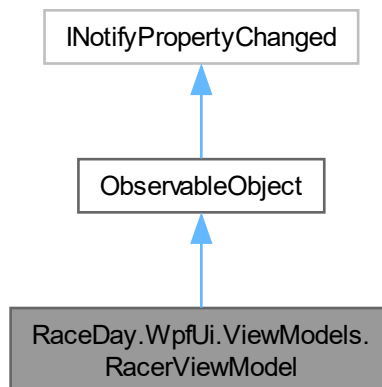

5.64 RaceDay.WpfUi.ViewModels.RacerViewModel Class Reference

A view model providing data and logic for the Racer view.

Inheritance diagram for RaceDay.WpfUi.ViewModels.RacerViewModel:

Collaboration diagram for RaceDay.WpfUi.ViewModels.RacerViewModel:

Public Member Functions

- delegate [RacerViewModel](#) **CreateRacerViewModel** ([RaceModel](#) raceModel, [RacerModel](#) racerModel)
A delegate factory method for creating a new RacerViewModel.
- [RacerViewModel](#) ([RaceModel](#) raceModel, [RacerModel](#) raceRacerModel, [IRacerLapQuery](#) racerLapQuery, [ICreateRacerLapCommand](#) createRacerLapCommand, [IDeleteRaceLapCommand](#) deleteRaceLapCommand)
Creates a new instance of the RacerViewModel class.

Properties

- [RacerModel](#) **Racer** [get]
The racer to be displayed.
- ImageSource? **MedallImage** [get, set]
An image source for displaying the racer's medal. This is only used for the top three racers within the race.
- ObservableCollection< [RacerLapModel](#) > **Laps** = new() [get]
A collection of all laps for the racer.
- TimeSpan **LapRecord** [get]
The fastest lap time for the racer.
- float **AverageLapSpeed** [get]
The average lap speed for the racer.
- int **LapCounter** [get]
The total number of laps for the racer.
- TimeSpan **LapTimer** [get, set]
The time of the current lap.
- bool **Started** [get, set]
Indicates whether the Racer already started the Race.
- bool **Finished** [get, set]
Indicates whether the Races has finished.
- bool **DisplayLaps** [get, set]

- A toggle for displaying the racer's laps component in the Ui.*
 - ICommand **ToggleLapsVisibilityCommand** [get]
 - A command for toggling the laps component visibility.*
- ICommand **StartTimerCommand** [get]
 - A command for starting the timer.*
- ICommand **StopTimerCommand** [get]
 - A command for stopping the timer.*
- ICommand **CatchLapTimeCommand** [get]
 - A command for catching the lap time.*
- ICommand **DeleteLapCommand** [get]
 - A command for deleting the selected lap.*

Additional Inherited Members

Protected Member Functions inherited from [RaceDay.WpfUi.Infrastructure.ObservableObject](#)

- virtual void [OnPropertyChanged](#) ([CallerMemberName] string? propertyName=null)
Raises the PropertyChanged event.
- virtual bool [SetField< T >](#) (ref T field, T value, [CallerMemberName] string? propertyName=null)
Sets the field and raises the PropertyChanged event if the value has changed.

Events inherited from [RaceDay.WpfUi.Infrastructure.ObservableObject](#)

- PropertyChangedEventHandler? **PropertyChanged**

5.64.1 Detailed Description

A view model providing data and logic for the Racer view.

5.64.2 Constructor & Destructor Documentation

5.64.2.1 RacerViewModel()

```
RaceDay.WpfUi.ViewModels.RacerViewModel.RacerViewModel (
    RaceModel raceModel,
    RacerModel raceRacerModel,
    IRacerLapQuery racerLapQuery,
    ICreateRacerLapCommand createRacerLapCommand,
    IDeleteRaceLapCommand deleteRaceLapCommand )
```

Creates a new instance of the RacerViewModel class.

Parameters

<i>raceModel</i>	The Race model
<i>raceRacerModel</i>	The Racer model
<i>racerLapQuery</i>	A query for retrieving RacerLap data
<i>createRacerLapCommand</i>	A command for creating a new RacerLap
<i>deleteRaceLapCommand</i>	A command for deleting a RacerLap

The documentation for this class was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/ViewModels/RacerViewModel.cs

5.65 RaceDay.WpfUi.Views.RacesSummaryView Class Reference

RacesSummaryView.

Inheritance diagram for RaceDay.WpfUi.Views.RacesSummaryView:

Collaboration diagram for RaceDay.WpfUi.Views.RacesSummaryView:

- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/Views/RacesSummaryView.xaml.cs

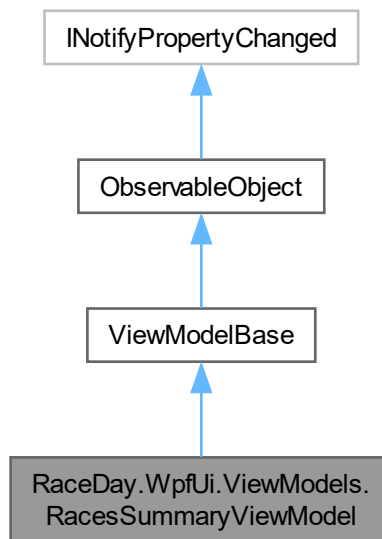

5.66 RaceDay.WpfUi.ViewModels.RacesSummaryViewModel Class Reference

A view model providing data and logic for Races Summary view.

Inheritance diagram for RaceDay.WpfUi.ViewModels.RacesSummaryViewModel:

Collaboration diagram for RaceDay.WpfUi.ViewModels.RacesSummaryViewModel:

Public Member Functions

- [RacesSummaryViewModel](#) ([DialogService](#) dialogService, [NavigationService](#) navigationService, [IRaceSummaryQuery](#) raceDayRacesQuery, [RaceViewModel.CreateRaceViewModel](#) createRaceViewModel)
Initializes a new instance of the RacesSummaryViewModel class.
- void [LoadRaceDayRaces](#) (DaySummaryModel raceDay)
Loads Race Details for given Race Day.
- void [UpdateViewTitle](#) (string? title)
Updates the View Title. It will append " - Races" to the title.

Properties

- ObservableCollection< [RaceSummaryModel](#) > **Races** = new() [get]
A collection of RaceSummaryModel objects. Each object contains summarized details about a race.
- [RaceSummaryModel?](#) **SelectedRace** [get, set]
The currently selected RaceSummaryModel.
- ICommand **CreateRaceCommand** [get]
A command for creating a new Race.
- ICommand **DisplayRaceCommand** [get]
A command for navigating to Race view.
- string **ViewTitle** [get]
The title of the view, updated when Race Day is selected.

Additional Inherited Members

Protected Member Functions inherited from [RaceDay.WpfUi.Infrastructure.ObservableObject](#)

- virtual void [OnPropertyChanged](#) ([CallerMemberName] string? propertyName=null)
Raises the PropertyChanged event.
- virtual bool [SetField< T >](#) (ref T field, T value, [CallerMemberName] string? propertyName=null)
Sets the field and raises the PropertyChanged event if the value has changed.

Events inherited from [RaceDay.WpfUi.Infrastructure.ObservableObject](#)

- PropertyChangedEventHandler? **PropertyChanged**

5.66.1 Detailed Description

A view model providing data and logic for Races Summary view.

5.66.2 Constructor & Destructor Documentation

5.66.2.1 RacesSummaryViewModel()

```
RaceDay.WpfUi.ViewModels.RacesSummaryViewModel.RacesSummaryViewModel (
    DialogService dialogService,
    NavigationService navigationService,
    IRaceSummaryQuery raceDayRacesQuery,
    RaceViewModel::CreateRaceViewModel createRaceViewModel )
```

Initializes a new instance of the RacesSummaryViewModel class.

Parameters

<i>dialogService</i>	The dialog service.
<i>navigationService</i>	The navigation service.
<i>raceDayRacesQuery</i>	Query to select all Races and their summary details for a given Race Day.

5.66.3 Member Function Documentation

5.66.3.1 LoadRaceDayRaces()

```
void RaceDay.WpfUi.ViewModels.RacesSummaryViewModel.LoadRaceDayRaces (
    DaySummaryModel raceDay )
```

Loads Race Details for given Race Day.

Parameters

<i>race</i> ↔ <i>DayId</i>	The Race Day Id.
-------------------------------	------------------

Here is the caller graph for this function:

5.66.3.2 UpdateViewTitle()

```
void RaceDay.WpfUi.ViewModels.RacesSummaryViewModel.UpdateViewTitle (
    string? title )
```

Updates the View Title. It will append " - Races" to the title.

Parameters

<i>title</i>	The title to set.
--------------	-------------------

Here is the caller graph for this function:

The documentation for this class was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/ViewModels/RacesSummaryViewModel.cs

5.67 RaceDay.WpfUi.Models.RaceSummaryModel Class Reference

A model for the Race Summary.

Properties

- int **RaceId** [get]
The unique identifier of the Race.
- int **RaceDayId** [get]
The unique identifier of the Race Day.
- DateTime? **RaceDate** [get]
The date of the race.
- int **TotalRacers** [get]
The total number of Racers participating in the Race.
- int **TotalLaps** [get]
The total number of Laps completed by all Racers in the Race.
- TimeSpan **BestLapTime** [get]
The best Lap Time in the Race.
- string? **BestLapTimeHolder** [get]
The name of the Racer with the best Lap Time.
- float **TotalIncome** [get]
The total income made from the Race.
- float **TotalExpenses** [get]
The total expense incurred.
- float **TotalProfit** [get]
The total profit.

5.67.1 Detailed Description

A model for the Race Summary.

The documentation for this class was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/Models/RaceSummaryModel.cs

5.68 RaceDay.SQLite.Queries.RaceSummaryQuery Class Reference

Inheritance diagram for RaceDay.SQLite.Queries.RaceSummaryQuery:

Collaboration diagram for RaceDay.SQLite.Queries.RaceSummaryQuery:

Public Member Functions

- **RaceSummaryQuery** (string connectionString)
- IEnumerable< RaceSummaryDto > **GetAll** (int raceDayId)
Gets all Races for Race Day summaries.
- RaceSummaryDto? **GetById** (int id)
Gets summary for a specific Race.
- IEnumerable< RaceSummaryDto > **GetAll** (int raceDayId)
Gets all Races for Race Day summaries.
- RaceSummaryDto? **GetById** (int id)
Gets summary for a specific Race.

Additional Inherited Members

Protected Member Functions inherited from [RaceDay.SQLite.Infrastructure.CommandQueryBase](#)

- [CommandQueryBase](#) (string dbPath)
Creates a new instance of the CommandQueryBase class.
- SQLiteConnection **CreateConnection** ()
Creates a new SQLiteConnection instance.

Properties inherited from [RaceDay.SQLite.Infrastructure.CommandQueryBase](#)

- SQLiteConnectionString **ConnectionString** [get]
The connection string to the database.

5.68.1 Detailed Description

5.68.2 Member Function Documentation

5.68.2.1 GetAll()

```

IEnumerable< RaceSummaryDto > RaceDay.SQLite.Queries.RaceSummaryQuery.GetAll (
    int raceDayId )
  
```

Gets all Races for Race Day summaries.

Parameters

<i>race↔ DayId</i>	The Race Day id
------------------------	-----------------

Implements [RaceDay.Domain.Interfaces.IRaceSummaryQuery](#).

Here is the call graph for this function:

5.68.2.2 GetById()

```
RaceSummaryDto? RaceDay.SQLite.Queries.RaceSummaryQuery.GetById (
    int id )
```

Gets summary for a specific Race.

Parameters

<i>id</i>	The Race Id
-----------	-------------

Implements [RaceDay.Domain.Interfaces.IRaceSummaryQuery](#).

Here is the call graph for this function:

The documentation for this class was generated from the following file:

- `D:/Personal/College.RaceDay/src/RaceDay.SQLite/Queries/RaceSummaryQuery.cs`

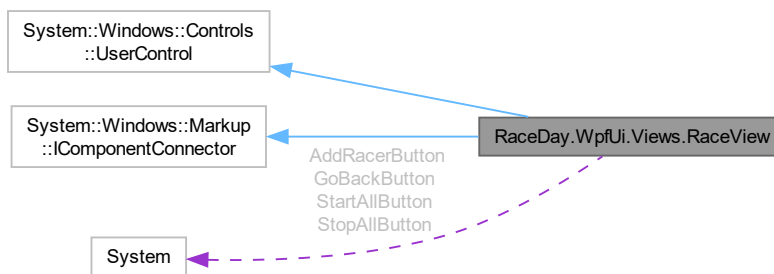

5.69 RaceDay.WpfUi.Views.RaceView Class Reference

RaceView.

5.70 RaceDay.WpfUi.ViewModels.RaceViewModel Class Reference

A view model providing data and logic for the Race view.

Inheritance diagram for RaceDay.WpfUi.ViewModels.RaceViewModel:

Collaboration diagram for RaceDay.WpfUi.ViewModels.RaceViewModel:

Public Member Functions

- delegate [RaceViewModel](#) **CreateRaceViewModel** ([RaceModel](#) raceModel)
A delegate factory method for creating a RaceViewModel from a RaceModel
- [RaceViewModel](#) ([RaceModel](#) raceModel, [DialogService](#) dialogService, [NavigationService](#) navigationService, [RacerViewModel.CreateRacerViewModel](#) createRacerViewModel, [IRacersQuery](#) racersQuery)
Creates a new instance of RaceViewModel

Properties

- [ObservableCollection](#)< [RacerViewModel](#) > **Racers** = new() [get]
A collection of view models representing Racers participating in the Race.
- [RaceModel](#) **RaceModel** [get]
The model of the Race being displayed.
- [ICommand](#) **StopAllCommand** [get]
A command for stopping timers of all Racers.
- [ICommand](#) **StartAllCommand** [get]
A command for starting timers of all Racers.
- [ICommand](#) **AddRacerCommand** [get]
A command for adding a Racer to the Race.
- [ICommand](#) **GoBackCommand** [get]
A command for navigating back.

Additional Inherited Members

Protected Member Functions inherited from [RaceDay.WpfUi.Infrastructure.ObservableObject](#)

- virtual void [OnPropertyChanged](#) ([CallerMemberName] string? propertyName=null)
Raises the PropertyChanged event.
- virtual bool [SetField](#)< T > (ref T field, T value, [CallerMemberName] string? propertyName=null)
Sets the field and raises the PropertyChanged event if the value has changed.

Events inherited from [RaceDay.WpfUi.Infrastructure.ObservableObject](#)

- PropertyChangedEventHandler? **PropertyChanged**

5.70.1 Detailed Description

A view model providing data and logic for the Race view.

5.70.2 Constructor & Destructor Documentation

5.70.2.1 RaceViewModel()

```
RaceDay.WpfUi.ViewModels.RaceViewModel.RaceViewModel (
    RaceModel raceModel,
    DialogService dialogService,
    NavigationService navigationService,
    RacerViewModel::CreateRacerViewModel createRacerViewModel,
    IRacersQuery racersQuery )
```

Creates a new instance of RaceViewModel

Parameters

<i>raceModel</i>	The Race model to display
<i>dialogService</i>	The dialog service
<i>navigationService</i>	The navigation service
<i>createRacerViewModel</i>	A delegate factory method for creating a RacerViewModel
<i>racersQuery</i>	A query for retrieving Racers

The documentation for this class was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/ViewModels/RaceViewModel.cs

5.71 RaceDay.Domain.Exceptions.RecordExistException Class Reference

Exception thrown when a record already exists.

Inheritance diagram for RaceDay.Domain.Exceptions.RecordExistException:

Collaboration diagram for RaceDay.Domain.Exceptions.RecordExistException:

Public Member Functions

- **RecordExistException ()**
Initializes a new instance of the RecordExistException class.
- **RecordExistException (string message)**
Initializes a new instance of the RecordExistException class.

5.71.1 Detailed Description

Exception thrown when a record already exists.

5.71.2 Constructor & Destructor Documentation**5.71.2.1 RecordExistException()**

```
RaceDay.Domain.Exceptions.RecordExistException.RecordExistException (
    string message )
```

Initializes a new instance of the RecordExistException class.

Parameters

<i>message</i>	The message that describes the error.
----------------	---------------------------------------

The documentation for this class was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.Domain/Exceptions/RecordExistException.cs

5.72 RaceDay.WpfUi.Infrastructure.RelayCommand Class Reference

A command that can be bound to a UI element.

Inheritance diagram for RaceDay.WpfUi.Infrastructure.RelayCommand:

Collaboration diagram for RaceDay.WpfUi.Infrastructure.RelayCommand:

Public Member Functions

- [RelayCommand](#) (Action< object?> execute, Func< object?, bool > canExecute)
Initializes a new instance of the RelayCommand class.
- bool [CanExecute](#) (object? parameter)
Defines the method that determines whether the command can execute in its current state.
- void [Execute](#) (object? parameter)
Defines the method to be called when the command is invoked.

Properties

- EventHandler? **CanExecuteChanged**
Occurs when changes occur that affect whether or not the command should execute.

5.72.1 Detailed Description

A command that can be bound to a UI element.

5.72.2 Constructor & Destructor Documentation

5.72.2.1 RelayCommand()

```

RaceDay.WpfUi.Infrastructure.RelayCommand.RelayCommand (
    Action< object?> execute,
    Func< object?, bool > canExecute )
  
```

Initializes a new instance of the RelayCommand class.

Parameters

<i>execute</i>	A delegate to execute when the command is executed
<i>canExecute</i>	A delegate to execute to determine if the command can be executed

5.72.3 Member Function Documentation

5.72.3.1 CanExecute()

```
bool RaceDay.WpfUi.Infrastructure.RelayCommand.CanExecute (
    object? parameter )
```

Defines the method that determines whether the command can execute in its current state.

Parameters

<i>parameter</i>	An optional parameter to pass to the command
------------------	--

Returns

true if this command can be executed; otherwise, false.

5.72.3.2 Execute()

```
void RaceDay.WpfUi.Infrastructure.RelayCommand.Execute (
    object? parameter )
```

Defines the method to be called when the command is invoked.

Parameters

<i>parameter</i>	
------------------	--

The documentation for this class was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/Infrastructure/RelayCommand.cs

5.73 RaceDay.WpfUi.Converters.RowIndexConverter Class Reference

Convenience converter to get the row index of an item in a list.

Inheritance diagram for RaceDay.WpfUi.Converters.RowIndexConverter:

Collaboration diagram for RaceDay.WpfUi.Converters.RowIndexConverter:

Public Member Functions

- object **Convert** (object value, Type targetType, object? parameter, CultureInfo culture)
- object **ConvertBack** (object value, Type targetType, object parameter, CultureInfo culture)

5.73.1 Detailed Description

Convenience converter to get the row index of an item in a list.

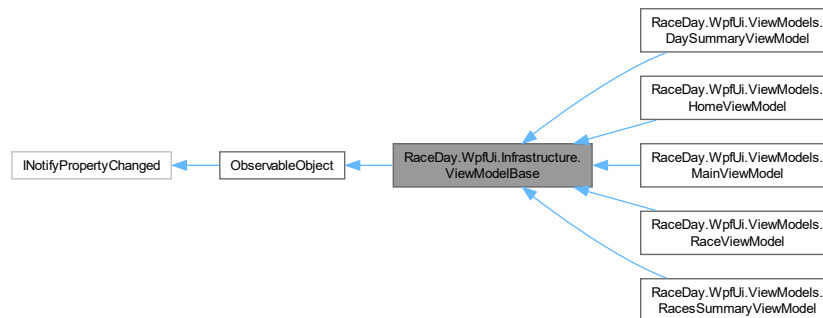

The documentation for this class was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/Converters/RowIndexConverter.cs

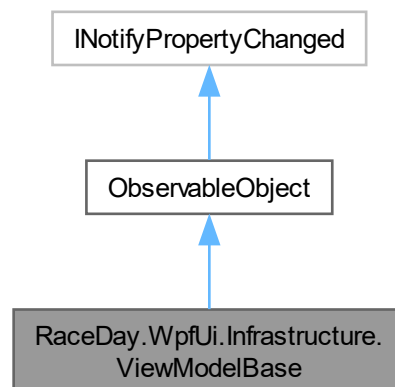

5.74 RaceDay.WpfUi.Infrastructure.ViewModelBase Class Reference

Base class for all view models.

Inheritance diagram for RaceDay.WpfUi.Infrastructure.ViewModelBase:

Collaboration diagram for RaceDay.WpfUi.Infrastructure.ViewModelBase:

Additional Inherited Members

Protected Member Functions inherited from [RaceDay.WpfUi.Infrastructure.ObservableObject](#)

- virtual void [OnPropertyChanged](#) ([CallerMemberName] string? propertyName=null)
Raises the PropertyChanged event.
- virtual bool [SetField< T >](#) (ref T field, T value, [CallerMemberName] string? propertyName=null)
Sets the field and raises the PropertyChanged event if the value has changed.

Events inherited from [RaceDay.WpfUi.Infrastructure.ObservableObject](#)

- PropertyChangedEventHandler? **PropertyChanged**

5.74.1 Detailed Description

Base class for all view models.

The documentation for this class was generated from the following file:

- D:/Personal/College.RaceDay/src/RaceDay.WpfUi/Infrastructure/ViewModelBase.cs
